Note: In the text, bids that are forcing to game are in red text and marked with a double dagger (‡) symbol. Bids that are forcing for at least one round are in blue text and marked with a dagger (†) symbol. Exceptions or unintuitive bids are highlighted.

1 Opening bids

All strong hands (with one exception¹) are opened 1♣ which is forcing for one round

In general, a major suit opening shows 5^+ -cards and the higher ranking suit is opened with suits of equal length. A no-trump opening shows a balanced hand with a possible 5-card minor. A club suit can be opened with $2\clubsuit$ with six or more cards in the suit.

A 1 \diamondsuit opening would normally be made with at least a 3-card holding but could sometimes be made with a doubleton when bidding 1NT or 2 \clubsuit is not attractive e.g., \spadesuit AQJ10 \heartsuit KQ \diamondsuit 76 \clubsuit J7642 (only 5 clubs) or \spadesuit AK109 \heartsuit AK98 \diamondsuit 32 \clubsuit 432 (both majors, two suits unstopped). Three suited hands with a singleton or void in diamonds are opened with an artificial bid of $2\diamondsuit$.

All opening bids from $1\diamondsuit$ through $2\diamondsuit$ are made with between 11 and 15 high card points (HCP). The strictly limited nature of these openings means that, in general, partner is not forced to respond with less than 8HCP.

1♣†	16 ⁺ HCP (unbalanced) or 17 ⁺ HCP (balanced). Hands with a
	powerful 6 ⁺ -card suit that can play opposite a singleton and
	have 15HCP with a void or singleton should also be opened with
	1♣, e.g., \spadesuit AQJ1098 \heartsuit 8 \diamondsuit KQ7 ♣QJ10. \Rightarrow
$1\diamondsuit$	11-15HCP, 3^+ -cards in \diamondsuit (could be 2), no 5-card major and less
	than 6 clubs. \Rightarrow
1♡, 1♠	11-15HCP, 5^+ -cards in suit bid. \Rightarrow
1nt	14-16HCP in $1^{st}/2^{nd}$ positions and 15-17HCP in $3^{rd}/4^{th}$ posi-
	tion, balanced. May have a five-card minor (even a 5-4-2-2
	distribution with a five-card minor is acceptable with stoppers
	in the doubletons). \Rightarrow
$2\clubsuit$	11-15HCP, 6 ⁺ -card club suit (7sQ hand), may have a 4 or 5-card
	major. \Rightarrow
$2\diamondsuit\dagger$	11-15HCP, 5-4-3-1, 4-4-4-1 or 5-4-4-0 shape with short \Diamond (5-card
	suit if present is \clubsuit). \Rightarrow
$2\heartsuit$, $2\spadesuit$	6-10HCP, exactly six cards in suit with two of the top three or
	three of the top five honours. \Rightarrow
2NT	22-23HCP, balanced hand, no 5-card suit. \Rightarrow
$3\spadesuit$, $3\heartsuit$,	Preemptive, 0-10HCP, 7 ⁺ -card suit (sq of 9 when vulnerable
$3\diamondsuit$, $3\clubsuit$	and 8 non-vulnerable). Apply rule of $2/3/4$. \Rightarrow
3NT	"Gambling", solid 7^+ -card minor suit (AKQ or better) with
	no outside ace or king. \Rightarrow
$4\clubsuit\ddagger$, $4\diamondsuit\ddagger$	Namyats—long semi-solid major suit (usually 8 ⁺ -cards) with 8
	or more tricks. Used in 1^{st} or 2^{nd} seat only. Constructive. \Rightarrow
4♡, 4♠	Preemptive with $7^{1}/2$ tricks.

As in $Standard\ American$, a 1NT response over an opening of one of a major is forcing for one round. Like the $2/1\ Game\ Force$ system a two-over-one response is mostly forcing to game.

In most cases, the bidding in *Precision* does not change with vulnerability or seat position.

 $^{^1\}mathrm{Balanced}$ 22-23 point hands are opened 2 NT.

2 Responses to 1♣

The responses to 14 can be negative, constructive or positive. All positive responses are forcing to game, i.e., holding a 14 hand, you want to be in a game contract opposite any random 8HCP hand.

```
Negative response
1 \diamondsuit \dagger
                    0-7HCP. Note that with an ace and a king (3 controls) either
                    in the same suit or two different 4<sup>+</sup>-card suits, a positive
                    response should be made. \Rightarrow
Constructive responses
2\heartsuit,
                    4-7HCP, 6<sup>+</sup>-card suit with two of the top four honours but
                    not both A and K when a positive suit response should be
                    made. \Rightarrow
Positive responses—forcing to game
                    8<sup>+</sup>HCP, 5<sup>+</sup>-cards in suit. There are no restrictions on suit
1\heartsuit\ddagger, 1\spadesuit\ddagger,
2♣‡, 2♦‡
                    quality. \Rightarrow
1NT‡
                    8-13HCP, balanced hand with no five-card suit. \Rightarrow
2NT^{\ddagger}
                    14^{+}HCP, balanced hand, forcing to 4NT. \Rightarrow
34‡
                    A solid 7 or 8 card suit (with or without side controls) that
                    will play for no losers opposite a singleton, e.g., AKQJxxx
                    or AKQxxxxx. \Rightarrow
Unusual positive—three-suited hands
34‡
                    8-11HCP or less than four controls, 4-4-4-1 shape with a
                    black singleton (spades or clubs). \Rightarrow
3\diamondsuit\ddagger
                    8-11HCP or less than four controls, 4-4-4-1 shape with a red
                    singleton (hearts or diamonds). \Rightarrow
3\heartsuit\ddagger, 3NT‡,
                    12<sup>+</sup>HCP and 4<sup>+</sup>-controls, 4-4-4-1 shape with singleton in
                    suit above the one bid (\spadesuit, \clubsuit, \diamondsuit, \heartsuit \text{ respectively}). \Rightarrow
4♣‡, 4♦‡
```

2.1 Bidding after a negative response

Opener rebids no-trumps with balanced hands (1NT: 17-19HCP, 2NT: 20-21HCP, 3NT: 24-26HCP), a 5-card suit with 16-21HCP and jumps in a 5-card suit with powerful hands (22^+ HCP). The jump rebid in a suit may be made with a lower point-count given greater playing strength.

Examples of bidding after a negative response.⇒

```
Balanced hands
              17-19HCP, balanced, no 5-card major (18-19HCP in 3^{rd}/4^{th}
1NT
              position). Responder's rebids are:
                Pass
                              0-5HCP, no major suit to escape to.
                24
                              6-7HCP, Stayman. \Rightarrow
                2 \diamondsuit \dagger, 2 \heartsuit \dagger
                              0-7HCP, transfer to 2\heartsuit and 2\spadesuit respectively.
                              Responder will invite with 7HCP and pass with
                              0-6HCP unless opener super-accepts. \Rightarrow
                              Texas transfers to 4\heartsuit and 4\spadesuit respectively.
              20-21HCP, balanced, may have a 5-card major. Responder's
2nt
              rebids are:
```

3♣† 4-7HCP, Puppet Stayman asking for 5-card majors if any. \Rightarrow $3\diamondsuit\dagger$, $3\heartsuit\dagger$ Weak, transfer to $3\heartsuit$ and $3\spadesuit$ respectively. 3nT4-5HCP, sign-off. $4\diamondsuit\dagger$, $4\heartsuit\dagger$ Transfer to $4\heartsuit$ and $4\spadesuit$ —sign-off. 3NT 24-26HCP, balanced hand, may have a 5-card major. Responder's rebids are: Pass0-4HCP, balanced. 4 of suit 5-7HCP, 5⁺-cards. Opener bids one above suit $(4\diamondsuit, 4\heartsuit, 4\spadesuit \text{ or } 4\text{NT})$ to show fit and start Roman key-card Blackwood. \Rightarrow 4NT5-7HCP, no 5-card suit, quantitative. Unbalanced hands $1\heartsuit, 1\spadesuit$ 5⁺-card suit, non-forcing. Can be only four cards if opener started with a 4-4-4-1 shape (with a singleton minor, opener will rebid $1\heartsuit$). Responder's rebids are: Pass0-4HCP, especially when balanced. 4-7HCP, 4⁺-cards, may have three hearts. It 1 is important to bid the spades before supporting hearts since opener may have bid $1 \odot$ holding a 4-4-4-1 distribution with both majors. 5-7HCP, no 5-card suit, no 4-card spade af-1NT ter $1\heartsuit$. May have 3-card support. This bid should be avoided as far as possible to prevent the strong hand from coming down. 2♣, 2♦ 5-7HCP, $5\text{-}\mathrm{card}$ suit, denies $3\text{-}\mathrm{card}$ support. 4-5HCP with 3^+ -card support. $Single\ raise$ 6-7HCP with 3⁺-card support. $Double\ raise$ Splinter with 4^+ -card support showing slam Jump shift! interest. E.g., bid 4♣ when holding ♠J1098 $\heartsuit 93 \diamondsuit AJ10987 \clubsuit 5$ after opener rebids $1 \spadesuit$. A splinter of 3. would be slightly weaker showing a game-going hand. $2\clubsuit$, $2\diamondsuit$ 5⁺-card suit, may have a 4-card major, non-forcing. Responses have the same structure as over $1\heartsuit$ and $1\spadesuit$. $2\heartsuit\dagger$, $2\spadesuit\dagger$ Powerful hand with 22⁺HCP and 5⁺-card suit, equivalent of a Standard 24 bid. Responder's rebids are: 2NT0-3HCP, minimum, no support. 3nT4-7HCP maximum, spread values, no support. Raise0-3HCP, minimum, 3⁺-card support. 4-7HCP, maximum, 3⁺-card support, no spe-Game raise cific values in other suits. New suit† 4-7HCP, values in suit, does not deny support for partner's suit. 3♣†, 3♦† Very strong unbalanced hand with a long minor and good playing strength that is too strong for either $2\clubsuit$ or $2\diamondsuit$. E.g., \triangle A \heartsuit AK \diamondsuit KQJ10876 \triangle QJ5 or \triangle KQJ5 \heartsuit 6 \diamondsuit A \triangle AKQ10964.

Pass

0-3HCP.

S♥‡, 3♠‡ Extremely powerful hand with a solid suit and at least nine tricks. This bid sets trumps and asks responder to cue-bid an ace or void. E.g., ♠AKQJ1098 ♥4 ♦KJ3 ♣AK or ♠65 ♥AKQ107543 ♦AKJ ♣— where a slam is on if responder can cue-bid. Responder bids:

New suit† First-round control—ace or void in suit.

No first round control but has a king or singleton in a non-trump suit. Opener rebids 4♣ to ask which suit.

Game raise Denies ace, king, singleton or void.

2.2 Bidding after a constructive response

Since responder is showing a strictly limited hand of 4-7HCP with a long suit, the opener needs to decide on the best contract. If there is no chance for game or slam, he should pass with a tolerance for responder's suit.

Pass	Game unlikely.					
$4\heartsuit, 4\spadesuit$	Sign-off, to play.					
$New\ suit \dagger$	Natural, 5 ⁺ -card suit. Responder's rebids are:					
	Raise 3^+ -card support (or Qx).					
	Rebid suit Minimum, no support.					
	3nt Maximum, no support.					
	New suit† Maximum with support, singleton or void					
	in suit bid.					
2NT‡	Showing support for suit and asking for shortness. Respon-					
	ders's rebids are:					
	Rebid suit Minimum, no singleton or void.					
	New suit Singleton or void in bid suit.					
3NT	AQ or KQ in suit.					
$4\clubsuit\dagger$	Roman key-card ask with modified responses since responder					
	cannot have more than 2 key cards. \Rightarrow					

2.3 Bidding after a positive no-trump response

Responder is showing a balanced hand with 8-13HCP (1NT) or 14^{+} HCP (2NT). After 1NT, opener can either (a) bid his own suit at the 2-level showing a 5-carder, (b) bid his own suit at the 3-level showing a very strong hand with slam interest, (c) bid 24 (*Transfer Stayman*) or (d) raise no-trumps.

All bidding sequences are forcing to game‡.

Examples of bidding after a positive no-trump response.⇒

1♣-1NT-2♣

24 over a response of 1NT is Transfer Stayman and responses are as below:

```
8-10HCP, 4 card ♡, may have 4 card ♠. Opener's rebids are:

2♡ Relay affirming fit in hearts—responder should
bid 2NT with 4-3-3-3 or a second suit at 3-level.

2♠ 4-card ♠, no 4-card ♡.

2NT No 4-card major.
```

$2 \heartsuit$	8-10HCP, 4 card \spadesuit , denies 4-card \heartsuit . Opener rebids:						
	2 Relay affirming fit in spades—responder bids						
	2NT with 4-3-3-3 else second suit at 3-level.						
	2NT No 4-card \spadesuit , may have 4-card \heartsuit .						
$2\spadesuit$	8-10HCP, no 4 card major. Opener then bids 2NT to ask for a						
	further description. Responder's rebids are:						
	$3 \clubsuit 3 \diamondsuit 4-3-3-3$ with 4-card suit.						
	$3\heartsuit$ 4-4 in minors with three hearts.						
	$3 \spadesuit$ 4-4 in minors with three spades.						
	3NT 5-card minor.						
2NT	11-13HCP, 4-3-3-3 shape. 3♣ by opener is then a relay asking						
	responder to bid his 4-card suit (3NT with clubs).						
3♣	11-13HCP, 4-4-3-2 shape with 4 clubs. Opener bids $3\Diamond$ as a						
	relay and responder bids 3♥ with spades, 3♠ with hearts and						
	3NT with diamonds.						
$3\diamondsuit$	11-13HCP, 4-4-3-2 shape with \Diamond and \heartsuit .						
3 %	11-13HCP, 4-4-3-2 shape with \heartsuit and ♠.						
3♠	11-13HCP, 4-4-3-2 shape with \spadesuit and \diamondsuit .						
3NT	11-13HCP, 5-card minor suit. 4♣ by opener is then a relay						
	asking responder to bid his suit.						

Suit bid after 1♣-1NT

When opener has a possible trump suit, he bids it asking responder to show shape and point range. With a very strong hand and a good suit, he can jump in the suit setting trumps and asking partner for his holding in that suit.

$2\diamondsuit$, $2\heartsuit$,	5 ⁺ -card suit, support-asking bid (2NT shows clubs). Respon-
$2\spadesuit$, 2nt	der's rebids are (minimum = $8-10$ HCP, maximum = $11-13$ HCP,
	support = Hxx , $xxxx$ or better):
	1 step Minimum and no support.
	2 steps Minimum with support.
	3 steps Maximum and no support.
	4 steps Maximum with support.
$3\clubsuit$, $3\diamondsuit$,	Very strong hand with slam interest, sets trumps and asks for
3♡, 3♠	responder's holding in the suit bid. Responses are in steps:
	1 step Two or three spot cards.
	2 steps Doubleton honour.
	3 steps Tripleton honour.
	4 steps Two honours doubleton.
	5 steps Two honours tripleton.
	6 steps Four card support.

Any suit bid after a support-asking bid is an ϵ control-asking bid in that suit. \Rightarrow

No-Trump raise after 1-1NT

Since a raise to $2\rm NT$ shows a club suit (see above), there are only two possible raises in no-trumps— $3\rm NT$ and $4\rm NT$.

3nt	Minimum balanced hand with no four-card major nor interest
	in slam.
4NT	Quantitative raise with a balanced hand and no four-card major
	inviting slam.

Bidding after 1♣–2NT

A 2NT response shows $14^+ \rm HCP$ and immediately puts the partnership in slam range. It is, therefore, forcing to 4NT. Responses are:

3.	Baron—asking responder to show 4-card suits upward	$\overline{\mathrm{ds}}$					
,-	(3NT would show 4-3-3-3 with four clubs).						
$3\diamondsuit$, $3\heartsuit$, $3\spadesuit$, $4\clubsuit$	5 ⁺ -card suit. Subsequent bidding is natural.						
3NT	Asks responder to clarify his point range as follows:						
	4♣ 14-15нср.						
	$4\diamondsuit$ 16-17HCP.						
	4♡ 18-19нср.						
	4♠ 20-21HCP.						
	4 NT 22^+ HCP.						

2.4 Bidding after a positive suit response

Opener rebids no-trumps with a balanced hand. With support for responder's suit he has the option of initiating a series of *asking bids*.² With an unbalanced hand and no support for responder's suit, opener bids his suit and further bidding is natural.

With a 4-4-4-1 distribution, if responder bids the singleton suit, opener should rebid no-trumps. E.g., 1NT over $1\heartsuit$ or 2NT over $2\diamondsuit$. If responder rebids his suit, opener should rebid NT. Partner should cater to this possibility and insist on his suit as trumps only with a 6^+ -card suit.

All bids short of game are forcing‡.

Examples of bidding after a positive response in a suit.⇒

New suit	5 ⁺ -card suit, denies 3-card support for responder's suit.					
	Subsequent bids are natural to find the correct game					
	contract. Responder's rebids are:					
	New suit 4^+ -card suit.					
	Raise 3^+ -card support.					
	Rebid suit 6 ⁺ -card suit, semi-solid if minor.					
	No-trumps 5-3-3-2 shape, values in unbid suits.					
1nt	17-19HCP, balanced (2NT over $2\clubsuit$ or $2\diamondsuit$). No 5-card					
	major, may have 3-card support (shows shape first).					
	After $1\heartsuit$ or $1\spadesuit$, a jump rebid of the suit shows a semi-					
	solid 6 ⁺ -card suit. A <i>jump shift</i> would show a 5-5 two-					
	suited limited hand—typically $KQxxx$ in both suits with					
	nothing outside.					

 $^{^2}$ As a rule of thumb, asking bids should not be used if two of the outside suits are missing first-round controls. This is because once asking bids are triggered, there is no way to return to natural bidding.

2NT	20-21HCP, balanced (3NT over $2\clubsuit$ or $2\diamondsuit$). No 5-card						
	major, may have 3-card support.						
$Single\ raise$	γ trump-asking bid—shows an extremely powerful hand						
	with distinct slam possibilities. \Rightarrow						
	Any further new suits bid by opener after the γ response						
	will be ϵ suit control-asking bids. \Rightarrow						
$Double\ raise$	Minimum balanced hand, 4-card support with good con-						
	trols. Avoids γ sequences.						
$Game\ raise$	Minimum balanced hand, 4-card fit with poor controls.						
$3\spadesuit$, $4\clubsuit$, $4\diamondsuit$, $4\heartsuit$	Splinter bid with 4^+ -card support and a singleton or						
	void in the bid suit.						
4nt	$Roman\ key\text{-}card\ Blackwood. \Rightarrow$						

In general, over a minor suit positive response, a rebid in no-trumps by opener is preferred if it is likely that the final contract will be 3NT. This will ensure that the strong hand is declarer. Similarly, with a 5-card minor suit, opener should consider rebidding no-trumps rather than his suit since, in most cases, 3NT is preferable to five of a minor.

2.5 Bidding after a 3 response

A $3\spadesuit$ response places responder with a solid 7^+ -card suit headed by AKQ with or without outside controls. The suit should be obvious on most occasions.

All bidding sequences are forcing to game‡.

Opener's rebids are:

3NT	To play. Responder should pass unless he has many outside con-
	trols.
4♣	β -ask for <i>outside</i> controls—responses are in the lower (0-3) scale.
	\Rightarrow
	Any following non-trump suit bid is an ϵ control ask. \Rightarrow
$4\diamondsuit$	Asks responder to bid his suit (diamonds are indicated by a 4NT
	response).
	A subsequent bid in a new suit would be an ϵ -ask. \Rightarrow
$4\heartsuit$,	5 ⁺ -card suit, to play. Responder should pass with 3-card support
4 ♠	or doubleton honour.

Examples of bidding after a $3 \spadesuit$ response.

2.6 Bidding after an unusual positive response

An unusual positive response shows a 4-4-4-1 distribution. With less than 4 controls (typically, 8-13HCP), the singleton is not shown directly— $3\clubsuit$ is bid with a black singleton and $3\diamondsuit$ is bid with a red singleton. With four or more controls (typically 12^+ HCP), the singleton is immediately known since responder bids the the suit below the singleton.

After $3\clubsuit$ or $3\diamondsuit$, opener bids the next higher suit to ask responder to clarify where his singleton lies. Responder bids one step above the relay to show the lower ranking suit and two steps above to show the higher ranking suit.

All bidding sequences are forcing to game‡.

Possible	sequences	after	an	unusual	positive	of	. 3 4	/3<	>

*			
1♣-3♣-3♦-35	4-4-4-1 (♣)	1♣-3♦-3♥-3♠	4-4-1-4 (♦)
1♣-3♣-3♦-3♦	1-4-4-4 (♠)	1 ♣ -3♦-3♥-3NT	$4-1-4-4 (\heartsuit)$

Once the singleton is known, opener can bid the singleton suit to initiate β and ask for the number of controls held (the lower scale is used after $3\clubsuit$ or $3\diamondsuit$ and the upper scale is used after the stronger responses). \Rightarrow

Examples of bidding after an unusual positive.⇒

2.7 Handling intervention over 1.

Over a double of 14, the additional bids of *Redouble* and *Pass* are used to provide more granular information in case of a negative response. When the double is conventional (e.g., shows both majors), the bidding is the same except that a bid of 1NT would also confirm stoppers in both majors. All other bids retain their normal meaning.

After 1 - (Double)		
\overline{Pass}	0-4HCP.	
$1 \diamondsuit \dagger$	5-7HCP, artificial.	
$Redouble \ddagger$	8 ⁺ HCP, usually balanced.	
1nt‡	Normal 8-13HCP, but if the double shows a two-suited hand,	
	shows stoppers in both implied suits.	
Others	Same as over 1♣ without intervention.	

After an overcall in a suit at the one-level, any suit or no-trump bid is a positive response forcing to game. A trap pass can be made when responder wants to double for penalties—in this case, he will pass a re-opening double by opener.

When opponents overcall with 1NT, the responses are different depending on whether the overcall is a genuine strong hand or is conventional showing a two-suiter (the *unusual no-trump*). In the latter case, the *unusual over unusual* approach repurposes the $2\clubsuit$ and $2\diamondsuit$ bids to show a game-going hand with a major suit.

After a one-level suit overcall $1 - (1 \lozenge / 1 \lozenge / 1 \spadesuit)$			
\overline{Pass}	0-4HCP or a trap pass.		
$Double\dagger$	5-8HCP unbalanced or 5 ⁺ HCP, balanced.		
$Suit \ddagger$	Natural, 8 ⁺ HCP, 5 ⁺ -card suit.		
Jump to $3\clubsuit$,	Unusual positive with 4-4-4-1.		
<i>3</i> \\$\\ \‡			
$Cue ext{-}bid\ddagger$	8 ⁺ HCP, balanced hand with no stopper in opponent's		
	suit.		
1NT‡, 2NT‡	Usual meaning and promises a stopper in opponent's		
	suit.		
After an artificial	l no-trump overcall 1-(1)$ (showing minors)		
\overline{Double}	Modest high-card points, suitable for penalising one of		
	opponent's suits, usually no 5-card major.		
$2\clubsuit\ddagger$, $2\diamondsuit\ddagger$	8 ⁺ HCP, 5 ⁺ -card heart or spade suit respectively.		

These two bids are the so-called unusual over unusual responses in which cue-bids of known suits correspond to forcing bids in the unbid suits.

 $2\heartsuit$, $2\spadesuit$ Natural, non-forcing. After a strong no-trump overcall 1 - (1 NT) \overline{Pass} 0-4нср.

5⁺HCP, balanced—for penalties. Double

5-8HCP, 5^+ -card suit. Suit

Over higher level overcalls, bidding is largely natural but responses over an unusual 2nt are still unusual over unusual.

1 ft	4		
After a suit overcall at 2-level			
Double	6-8HCP, any shape. Any suit rebid by opener would be a		
	one-round force.		
$Suit \ddagger$	Natural and forcing to game. Note that a jump to $3\diamondsuit$ over $2\clubsuit$		
	would be an unusual positive.		
2NT‡	8-10 or 14 ⁺ HCP, with stopper in opponent's suit.		
3nt‡	11-13HCP with stopper in opponent's suit.		
$Cue ext{-}bid\ddagger$	Values to be in game but no clear-cut action—no long suit, no		
	stopper in overcaller's suit.		
After an o	vercall of 2NT (unusual no-trump)		
\overline{Double}	Penalty oriented, usually no 5-card major.		
3♣‡, 3♦‡	8^+ HCP, 5^+ -card heart or spade suit respectively (un-		
	usual/unusual).		
After an o	vercall at 3-level		
\overline{Double}	Balanced hand with 8 ⁺ HCP.		
$Suit \ddagger$	Positive, natural, game forcing.		
3nt			
After an overcall at 4-level			
\overline{Double}	Shows values—support for partner if he bids and provides		
	defence if he passes.		
Suit	Natural.		

Intervention after a negative response

If the intervention occurs after partner's negative response of $1\diamondsuit$, e.g., $1\clubsuit$ (Pass)-1 \diamondsuit - $(RHO\ doubles\ /\ bids)$, opener should rebid as follows:

After $1 - 0$	$(Pass)-1\lozenge-(Double)$ (usually showing diamonds)
\overline{Pass}	Balanced minimum (no 5-card suit).
1nt	Upper end of range with diamond stopper.
Suit	Same meaning as without the double.
After a 1-l	evel suit overcall $1\clubsuit - (Pass) - 1\lozenge - (1\heartsuit/1\spadesuit)$
\overline{Pass}	Balanced minimum (no 5-card suit).
$Double \dagger$	For takeout with support for other suits.
Suit	Natural, at least 5-cards, non-forcing.
1NT	Upper end of the range with stopper.
2NT	Same as 2NT without interference but promises stopper.
$Cue ext{-}bid\dagger$	Strong hand, lacking stopper in overcalled suit.

After a no-trump overcall $1 - (Pass) - 1 - (1 \text{ NT})$ (showing minors)		
\overline{Pass}	Balanced minimum (no 5-card suit).	
Double	Penalty oriented.	
2♣†	Heart suit with extra values (unusual/unusual).	
$2\diamondsuit\dagger$	Spade suit with extra values (unusual/unusual).	
$2\heartsuit$, $2\spadesuit$	Natural, non-forcing.	
2NT	Upper-end of the 1NT rebid range with stoppers in both minors.	
After an intervention above 1-level		
\overline{Pass}	Balanced minimum (no 5-card suit).	
Others	A little extra weight as compared to without the intervention.	
	Unusual/unusual applies over a 2NT overcall.	

Examples of bidding after opponents intervene. \Rightarrow

3 Responses to $1 \diamondsuit$

A $1\diamondsuit$ opening guarantees 11-15HCP and at least three diamonds although it could occasionally be a doubleton. Regardless, the bid is not forcing and partner can pass with a poor hand (0-7HCP and no 4-card major).

When opener does not have a genuine diamond suit, it is either because (a) he is interested in the major suits but does not have a five-carder, (b) he holds a club suit but cannot bid 2. because it is less than six cards or (c) he has a balanced hand that cannot be opened with 1NT, i.e., 11-13HCP. The opener's first rebid will clarify which type of hand he holds (bid or raise a major suit with (a), bid clubs with (b), or bid no-trumps or a minor with (c)). Opener's rebids will also classify his point range into a minimum (11-13HCP) or maximum (14-15HCP).

The first priority for both partners is to establish a 4-4 major suit fit if it exists so a bid by either partner that skips a major suit implies that he does not hold four cards in the major. If a major suit fit is found, a real diamond suit holding in opener's hand may never be mentioned.

Responder will always bid either $1 \spadesuit (4^+\text{-card spades})$, less than four cards in hearts) or $1 \heartsuit (4^+\text{-card hearts})$, may also have $4^+\text{-card spades})$ if he has a four-card major so any other bid *denies four cards in either major suit*. As a consequence, *Precision* does *not* have the concept of 4^{th} -suit forcing that is found in standard systems and a simple rebid by responder in a new suit (which may be a six-card suit) is always non-forcing. However, any new suit bid at the three-level (with or without a jump) is forcing.

3.1 Responder has a 4-card major

Opener's rebids after a response of 1% (usually 3 6^+ HCP, 4^+ -card suit, may also have a 4-card spade suit) are as follows:

1 ♠ †	4-card \spadesuit , denie	s four cards in hearts. Responder rebids:
	2♠	8-9HCP, 4-card spades.
	3♠	10-11HCP, 4-card spades, invitational.
	$4\spadesuit$	Weak hand with long trumps or strong hand
		with no interest in slam.
	1nt	Minimum hand, sign-off.
	2NT	10-12HCP, balanced hand, invitational.
	$2\clubsuit$, $2\diamondsuit$, $2\heartsuit$	Minimum hand, 5 ⁺ -cards, attempt to find a
		better part-score, non-forcing.
	3♣‡	Could be a 3-card suit. Opener should show
		3-card heart support with $3\heartsuit$.
	$3\diamondsuit\dagger$	5 ⁺ -card suit, strong hand, game-going.
	3 %	Jump rebid indicates a 6 ⁺ -card suit with 10-
		12hcp. Invitational.
	$Double\ jump$	Splinter bid with singleton or void and spade
	$shift \ddagger$	support.

³Sometimes, with favourable vulnerabilty and an extremely weak hand, a tactical bid may be made to interfere with opponent's game. E.g., holding ♠754 \heartsuit J852 \diamondsuit 985 ♣654, you could bid 1 \heartsuit planning to pass any rebid by opener.

1NT 11-13HCP, balanced, denies 4-card major. Can be 3-3-2-5 shape. Responder can rebid:

2NT 11-12HCP, balanced hand, invitational.

3NT $13^{+}HCP$, balanced hand.

 $2\clubsuit$, $2\diamondsuit$, 2♡ Minimum with 5⁺-card suit, retreat from no-

trumps.

 $2 \uparrow$ Reverse, at least 4-4 in the major suits, strong

hand.

 $3 \diamondsuit \dagger$ 5⁺-card diamonds, strong hand.

Jump shift‡ Could be a 3-card suit. Intermediate bid to

decide between 3NT and $4\heartsuit$ (if opener shows

delayed support with $3\heartsuit$).

2. Unbalanced, usually 5-4 in minors and no 4-card major. Responder's rebids:

 $2\Diamond$ Weak hand, to play, preference for diamonds.

 $2\heartsuit$ 6⁺-card suit, to play.

24† Reverse, 5-4 in the major suits, strong hand. 34 10-12HCP, at least 3-card support for clubs.

 $3\diamondsuit^{\dagger}$ 5⁺-card suit, strong hand, invitational.

3NT To play.

Double jump Splinter—singleton or void in suit bid and club

shift‡ support.

 $2\diamondsuit$ 6⁺-card diamond suit, no 4-card major, non-forcing.

Single raise—4-card heart suit, 11-13HCP. Could be a 3-card suit with a singleton elsewhere when no other bid is available. E.g., $\spadesuit 2$ $\heartsuit AK9 \diamondsuit J9832 \clubsuit A1092$.

3♡ Jump raise—4-card heart suit, 14-15HCP.

2 \spadesuit Reverse—14-15HCP, 6⁺-cards in diamonds and 4⁺-cards in spades.

2NT 14-15HCP, good diamonds and stoppers in the unbid major and clubs.

3. 14-15HCP, at least 5-5 in minors with points concentrated in the two suits.

 $3\diamondsuit$ 14-15HCP, 6⁺-card diamond suit, no 4-card major.

The bidding after a response of $1 \spadesuit (6^+\text{HCP}, 4^+\text{-card})$ spade suit, less than four hearts) is similar to that after a response of $1 \heartsuit$ but is repeated here for convenience. Opener's rebids are:

- Single raise—4-card spade suit, 11-13HCP. Could be a 3-card suit with a singleton elsewhere.
- 3♠ Jump raise—4-card spade suit, 14-15HCP.

1NT 11-13HCP, balanced, may have 4-card hearts. Responder can rebid:

2NT 11-12HCP, balanced hand, invitational.

3NT 13⁺HCP, balanced hand.

2 \clubsuit , 2 \diamondsuit , 2 \spadesuit 5⁺-card suit, minimum, retreat from no-trumps. *Jump shift*‡ Could be a 3-card suit. Intermediate bid to

decide between 3NT and $4\spadesuit$ (if opener shows delayed support with $3\spadesuit$).

2. Unbalanced, usually 5-4 in minors and no 4-card major. Responder's rebids:

 $2\diamondsuit$ Weak hand, to play. 6^+ -card suit, to play. 2**♠ 3♣** 10-12HCP, at least 3-card support for clubs. $3\Diamond\dagger$ 5⁺-card suit, strong hand. $3 \mathrm{NT}$ To play. Double jump Splinter—singleton or void in suit bid and club support. $2\diamondsuit$ 6⁺-card diamond suit, no 4-card major, non-forcing. $2\mathrm{NT}$ 14-15HCP, good diamonds and stoppers in the unbid major and 3♣ 14-15HCP, at least 5-5 in minors with points concentrated in the two suits. 14-15HCP, 6^+ -card diamond suit, no 4-card major. $3\diamondsuit$

3.2 Responder does not have a 4-card major

 $\underline{Balanced\ hands}$

When responder does not have a four card major, he has the following bids:

1nt	8-10HCP, usually balanced hand.			
2NT	11-12HCP, balanced. Could be a 4-3-3-3 shape with a weak			
	four card major and tenaces that would play better as declarer			
	in NT. E.	in NT. E.g., ♠AQ10 ♡10642 ♦Q109 ♣K107 or ♠9843 ♡KJ10		
	♦AQ7 ♣J	J105		
3NT	13-15нср.	, balanced.		
Support for		(inverted raises)		
$2\diamondsuit\dagger$	11 ⁺ HCP, §	5^{+} -card diamond suit, forcing to 2NT or $3\diamondsuit$.		
$3\diamondsuit$		5^+ -cards in \diamondsuit , usually with a singleton or void.		
$4\diamondsuit$	Preempti	ve, with more shape and trumps than for $3\diamondsuit$, i.e., 6		
	or 7 -card	diamond suit.		
$\underline{Unbalance}$				
2♣†		isually 5 ⁺ -card suit but could be four cards. Opener's		
	rebids are			
	$2\heartsuit$	11-14 [−] HCP, \heartsuit stopper, no \spadesuit stopper.		
	2♠	11-14 [−] HCP, \spadesuit stopper, no \heartsuit stopper.		
	2nt	11-14 ⁻ HCP, stopper in both majors.		
	$2\diamondsuit$, $3\diamondsuit$			
	$3\heartsuit\ddagger$	14 ⁺ -15HCP with a heart stopper and no spade		
		stopper.		
	3 ♠ ‡	14 ⁺ -15HCP with a spade stopper and no heart		
		stopper.		
	3nt	14 ⁺ -15HCP with stoppers in both majors.		
am a A	3♣	No stopper in majors.		
$2\heartsuit$, $2\spadesuit$		np shift (0-7HCP) with a long suit, non-forcing.		
	-	rebids are:		
	2nt	11-12HCP, no 4-card major.		
	3♣	Shows both minors and asks responder to		
9.€.	Invitation	choose between 3\$, 3\$ and 3NT.		
3♣	AQJ865	al, with a long club suit. E.g., $\spadesuit Q4 \ \heartsuit 75 \ \diamondsuit 97$		
	⊕ ₩61900	'±		

```
3 \heartsuit \dagger, 3 \spadesuit \dagger, Splinter bid with 5<sup>+</sup>-card diamond support.

4 \clubsuit \dagger

4 \heartsuit, 4 \spadesuit Single-suited hand with 7<sup>+</sup>-cards and no slam interest.
```

Examples of bidding after a 1 \diamondsuit opening. \Rightarrow

3.3 Intervention after a 1\$\ightarrow\$ opening

If opponent doubles $1\diamondsuit$, most responses are the same except that raises in diamonds are not inverted. Since opener often uses $1\diamondsuit$ as a vehicle to discover a 4-4 major fit, responder, lacking the strength to redouble should bid a four-card major if he has one.

Pass	0-4HCP or a "trap pass".
$New\ suit$	$4-9$ HCP, 4^+ -cards, no longer forcing.
1NT	6-9HCP, no 4-card major.
$2\diamondsuit$, $3\diamondsuit$	0-10HCP with length in diamonds since opener may be
	short.
2 NT \dagger	10^{+} HCP, 5^{+} -card diamond suit, replaces $2⋄$ "inverted
	raise".
Redouble	10 ⁺ HCP. No specific distribution, may be for penalties.
$Jump\ shift$	Weak, usually 7 ⁺ -card suit without interest in playing
	in another suit or NT.

After an overcall by opponent up to the $2\spadesuit$ level, the responses are:

Pass	Poor hand with nothing to bid or "trap pass".	
Double	8^+ HCP, negative double. \Rightarrow	
$New\ suit \dagger$	10 ⁺ HCP, natural—if at two-level, values for two-over-one	
	response.	
Raise	6-10HCP, 5 ⁺ -card diamonds (no longer "inverted").	
$Jump\ raise\dagger$	11 ⁺ HCP, 5 ⁺ -card diamonds (no longer weak).	
1nt	8-10HCP, stopper in opponent's suit, balanced.	
2nt	11-12HCP, stopper in opponent's suit, balanced.	
3nt	12 ⁺ -15HCP, stopper in opponent's suit, to play.	
$Cue ext{-}bid\ddagger$	13 ⁺ HCP with slam interest. A passed hand may cue-bid	
	with 10^+ HCP as a game try.	
$Jump\ Cue$ - $bid\dagger$	After a one-level overcall, a <i>jump</i> cue-bid at the three	
	level asks opener to bid 3NT with a stopper in opponent's	
	suit.	

4 Responses to $1\heartsuit$ or $1\spadesuit$

Responses to a major opening include Bergen raises, splinter bids, a forcing 1NT and 2/1 game force.

Pass	0-7HCP and poor	r support.	
Raises with su	-	11	
Single raise		card support, constructive.	
Jump raise	0-6HCP with 4-card support (preemptive $Bergen$ raise). \Rightarrow

	2NT	11-13HCP, stoppers in unbid suits	a good
	Raise	11-13HCP, good support, non-forcing.	5 ⁺ -card suit
	$Jump\ in\ new$	14-15HCP, good support, control in bid	and is
	suit	suit.	non-forcing.
	Jump rebid sui	jump rebid should be made on the basis	
	3nt	of playing strength rather than HCP. 15HCP, stoppers in unbid suits.	

Other bids at 3-level and above

Double jump Splinter bid, singleton or void in bid suit, 4⁺-card support, slam interest.

3NT† 14-15HCP, usually 4-card support for opener's major, responder lacks a void or singleton, minimum 4 controls.

A response of $1\spadesuit$ over $1\heartsuit$ shows 8^+ HCP with a 4-card suit and is forcing for one round†. Opener's rebids are:

Balanced h	\underline{vands}		
1nt	11-13HCP, minimum.		
2NT	14-15HCP, balanced, stoppers in both minors.		
3NT	To play with running suit.		
$\underline{Unbalance}$	d hands		
$2\clubsuit$, $2\diamondsuit$	11-15HCP, 4 ⁺ -card suit, non-forcing.		
$2\spadesuit$	11-13HCP, 4-card support.		
3♣, 3♦	13-15HCP, 5-card suit.		
3 %	13-15HCP, 6 ⁺ -card heart suit.		
3♠	$13-15$ HCP with 4^+ -card spade support.		
4 %	To play—distributional hand.		
$4\spadesuit$	To play—maximum 13-15HCP and distributional values.		
Slam tries			
$4\clubsuit\ddagger$, $4\diamondsuit\ddagger$	Splinter bids, good spade support (Qxx, xxxx or better), slam		
	interest.		
4nt	Roman key-card Blackwood with spades as trumps. \Rightarrow		

Examples of bidding after a major suit opening. \Rightarrow

4.1 Intervention after a major suit opening

After an opponent's double, responder can bid:

Pass	0-4HCP or a "trap pass".
Raise, Jump	0-10HCP, preemptive, 3^+ -card support $(4^+$ -cards for
$raise,\ Game$	jumps) following the Law of Total Tricks.
raise	
$New\ suit$	4-9HCP, 5 ⁺ -card suit, non-forcing.
$Jump\ shift$	Weak, usually 7 ⁺ -card suit without interest in playing
	in another suit or NT.
1nt	6-11HCP, balanced.
2 NT \ddagger	12^{+} HCP, 4^{+} -card support, $Jacoby\ 2$ NT. \Rightarrow .
Redouble	12 ⁺ HCP, no specific distribution, may be for penalties.

After an opponent's overcall, responder's bids are:

Pass	Poor hand of 0-7HCP or "trap pass".
Double	8^{+} HCP, negative double 4^{+} cards in unbid major. \Rightarrow
Raise	Competitive, typically 6-10 _{HCP} , 3 ⁺ -card support.
$Jump\ raise$	11-12HCP, limit raise (replaces $Bergen$ raise of $3\diamondsuit$).
$New\ suit \dagger$	10 ⁺ HCP, 5 ⁺ -card suit (values for a 2-over-1 response).

1nt	8-10HCP with stopper in opponent's suit.
2NT	11-12HCP with stopper in opponent's suit.
3NT	12 ⁺ -15HCP, stopper in opponent's suit, to play.
$Cue ext{-}bid\ddagger$	13 ⁺ HCP, slam interest. A passed hand may cue-bid with
	10^+ HCP as a game try.
	After a $1 \spadesuit$ overcall over $1 \heartsuit$, a <i>jump</i> cue-bid of $3 \spadesuit$ asks
	opener to bid 3NT with a stopper in spades.

5 Responses to 1NT

A 1NT opening shows a 14-16HCP balanced hand (15-17HCP in 3^{rd} or 4^{th} seat) without a 5-card major suit (a 5-card minor is possible). Simple arithmetic will almost always tell responder how high to place the contract. E.g., 0-8HCP: 1NT or 2 of suit, 9-10HCP: game invite, 11-17: game force, 18+: slam. The response structure below is applicable when 1NT is opened in 1^{st} or 2^{nd} seat since otherwise, responder is already limited to less than 11HCP.

$\overline{Balanced\ h}$	Balanced hands—Quantitative raises		
\overline{Pass}	0-8HCP, balanced hand (or 5-card minor).		
2NT	9-10HCP, balanced hand—invitation to 3NT.		
3NT	11-15HCP, balanced hand, sign-off.		
4NT	16-17HCP, balanced hand, invites slam with a maximum.		
5NT†	20-22HCP, balanced—partner to choose between 6NT and 7NT.		
6nt	18-19HCP, balanced, sign-off.		
$\underline{Unbalancea}$	d hands		
2♣†	$Stayman. \Rightarrow$ This can be used on both weak and strong hands.		
	Weak hand with When $2\heartsuit$ or $2\spadesuit$ is preferable to 1NT,		
	both majors responder bids 2. and passes any major		
	suit response. If opener denies majors		
	with $2\diamondsuit$, responder rebids $2\heartsuit$ asking		
	opener to pass or correct to $2 \spadesuit$.		
	Invitational or To find a 4-4 major suit fit (implies one		
	game-forcing 4-card major). With 5-4 in the majors		
	hands and a game-going hand, if opener denies		
	majors with $2\diamondsuit$, responder jumps in the		
	4-card suit to $3\heartsuit \ddagger/3 \spadesuit \ddagger$ which shows 5-		
	cards in the other major ($Smolen$ con-		
	vention). Opener can then bid 3NT with		
	a doubleton or $4\heartsuit/4\spadesuit$ with 3-card sup-		
	port.		
$2\diamondsuit\dagger$, $2\heartsuit\dagger$	$Jacoby$ transfers to $2\heartsuit$ and $2\spadesuit$ respectively. May be made with		
	both strong and weak hands. \Rightarrow		
$2 \spadesuit \dagger$	Minor suit Stayman—shows a minor 2-suiter (5-4 or better)		
	and asks opener to bid his 4-card minor. This is used with		
	either very weak hands or strong slam-invitational hands. With		
	intermediate hands, you will want to play 3NT so asking for		
	minors is not helpful. Opener responds:		
	$3\clubsuit$, $3\diamondsuit$ 4-card suit. Responder will pass with a weak hand		
	or bid on with slam interest.		
	$2NT^{\dagger}$ No four card minor. Responder rebids $3\clubsuit$ with a		
	weak hand asking opener to pass or correct to $3\diamondsuit$.		
	With a strong hand, responder bids $3\heartsuit^{\ddagger}$ or $3\spadesuit^{\ddagger}$		
	to show a singleton.		
3 of suit‡	10 ⁺ HCP, good 5 ⁺ -card suit.		
$4\diamondsuit\ddagger$, $4\heartsuit\ddagger$	Texas transfers to $4\heartsuit$ and $4\spadesuit$ respectively. Denies slam values.		
\underline{Others}			
4♣‡	Gerber ace-asking. \Rightarrow		

5.1 Intervention after opening 1NT

If an opponent doubles 1NT for penalties, we use the *Meckwell Escapes* to run to a safer contract. This does not work very well if responder has a 4-3-3-3 distribution and in this case, responder can either treat his four-card suit as a five-card suit, or treat his four-card suit and his best 3-card suit as a two-suiter and pray that the opponents elect to introduce a suit of their own.

$Pass\dagger$	Forcing, shows either clubs, diamonds or both majors. Opener
	must rebid 2♣ after which responder rebids:
	Pass 5-card club suit, escape completed.
	$2\diamondsuit$ 5-card diamond suit.
	$2 \heartsuit \dagger$ 4-4 in the majors, opener passes or corrects to $2 \spadesuit$.
Redouble	Natural, non-forcing.
2♣	Clubs and another suit, 4-4 or better. Opener passes or corrects
	to $2\Diamond$ asking for the higher suit.
$2\diamondsuit$	Diamonds and a higher ranking suit, 4-4 or better. Opener
	passes or corrects to $2\heartsuit$ asking for the higher suit.
$2\heartsuit$, $2\spadesuit$	Natural, 5-card suit.
3 of suit	6 ⁺ -card suit, invitational.

After an opponent's overcall, responder has the following choices:

Double	Penalty double.
Suit at 2-level	0-6HCP, natural and non-forcing.
2 NT \dagger	$lebensohl$ —partner must bid 3 \Rightarrow
Suit at 3-level‡	Natural, forcing to game.
$Cue ext{-}bid\dagger$	Asks opener to bid a 4-card major if he has one,
	denies a stopper in opponent's suit.
3nt	$lebensohl$ —denies stopper in opponent's suit. \Rightarrow

6 Responses to 2.

Bidding after a $2\clubsuit$ opening (11-15HCP, 6^+ -card club suit) is largely natural except for the conventional $2\diamondsuit$ response that asks opener to further describe his hand. Note that a direct $4\diamondsuit$ (not 4NT) is used to trigger key card asking.

Pass	0-7HCP, poor	r hand.
Weak respe	ponses	
3♣		raise based on a club fit. Not forward-going.
4♣	Preemptive	raise with extra club support or distributional
	-	npared to a raise to 3.
$2\heartsuit$, $2\spadesuit$		n-forcing, invitational. Opener may pass with a
, .		d mild support.
2NT		vitation to 3NT. Any rebid other than 34 (sign-off)
		ommits to game.
4♡, 4♠		it with no interest in slam, to play.
Strong resp		····

Examples of bidding after a 2 \clubsuit opening. ⇒

6.1 Intervention after a $2\clubsuit$ opening

After an opponent's double, all bids carry their normal meaning. The extra bid of Redouble shows $10^+ \rm HCP$ and is penalty oriented.

Over an opponent's overcall, raises are natural. Others:

$Double\dagger$	8^{+} HCP, negative double. \Rightarrow
$Cue ext{-}bid\ddagger$	12+HCP, singleton or void in opponent's suit.
$New\ suit \dagger$	Any new suit bid is natural and forcing.

7 Responses to $2\diamondsuit$

A $2\diamondsuit$ opening describes a three suited hand with shortness in diamonds and the responder can place the contract fairly easily in most cases. The only positive responses are the artificial bids of 2NT or $3\diamondsuit$ (both forcing to game).

Pass	6+ diamonds, no interest in other suits or bidding higher.	
2♡, 2♠, 3♣	Natural, sign-off.	
2NT‡	11+HCP, artificial, asks opener to further describe his hand	d.
	Opener's rebids are:	
	$3\clubsuit$, $3\diamondsuit$ $3=4=1=5$ or $4=3=1=5$ shape respectively.	
	$3\heartsuit$ 11-13HCP and $4=4=1=4$ shape.	
	$3 \spadesuit$ 14-15HCP and $4=4=1=4$ shape.	
	3NT 14-15HCP, $4=4=1=4$ shape and $\Diamond A$ or $\Diamond K$.	
	4♣ 11-13HCP, $4=4=0=5$ shape.	
	$4\diamondsuit$ 14-15HCP, $4=4=0=5$ shape.	
	A further rebid in diamonds (the singleton suit) by opene	er
	would be β asking for controls. \Rightarrow	
$3 \diamondsuit \dagger$	β control-asking bid.	
$3\heartsuit, 3\spadesuit$	7-9HCP, preemptive, 5 ⁺ -card suit.	
4♥, 4♠, 5♣	Sign-off, to play.	

Examples of bidding after a 2 \diamondsuit opening. \Rightarrow

7.1 Intervention after a 2\(\int\) opening

When opponents double $2\diamondsuit$ (possibly showing values in diamonds):

Pass†	Waiting action, forcing. Partner will redouble with a
	minimum hand or bid $2\heartsuit$ or $2\spadesuit$ (four card suit) with a
	3-4-1-5 shape.
Redouble	Desire to play in diamonds with a long suit. Prepared to
	punish the opponents when they run from the redouble.
Others	Same meaning as without the double.

Responses after an opponent's overcall:

\overline{Double}	For penalties.	
2NT‡	Same as without overcall.	
Others	Natural, non-forcing.	

8 Responses to $2\heartsuit$ or $2\spadesuit$

Opener shows exactly six cards in the suit bid with two of the top three honours (or three of the top five) and 6-10HCP. It denies four cards in the unbid major.

Without two-card support, it is generally correct to pass unless holding 16^+ HCP or a very good suit of one's own. The general system of responses is called RONF (Raise is the Only Non-Forcing bid) and any new suit bid is forcing asking partner to raise with 3-card support. A raise is a sign-off and opener should not bid again.

A 2NT response asks opener to show a "feature" (an outside stopper, i.e., an ace or king). If there is a suit fit, the feature will help in deciding whether to bid game with an invitational hand. Likewise, without a suit fit, it could help in deciding whether to bid 3NT.

Summary of responses:

Pass	No game, no fit.
Raise	6-9HCP, 3-card support, sign-off.
$Game\ raise$	Variety of hands, sign-off. E.g., raise to 4♥ with either
	\triangle AKJ3 \heartsuit Q5 \diamondsuit 4 \triangle A76432 or \triangle 4 \heartsuit KJ43 \diamondsuit KJ743 \triangle 1087.
$New\ suit^{\dagger}$	13 ⁺ HCP, 5 ⁺ -card suit, asking for 3-card support. E.g., with
	$AKJ943 \ \heartsuit 2 \ \Diamond AQ10 \ \1095 , bid $2 \ \phi$ over $2 \ \heartsuit$. Opener's
	rebids are:
	Raise 3^+ -card support.
	Rebid suit No support.
2 NT \dagger	Either 16 ⁺ HCP or 13 ⁺ HCP with 3-card support. Opener's
	rebids are:
	Rebid suit No outside stoppers.
	New suit Stopper in suit bid.
	3NT Very good suit headed by AQJ , AKJ , or
	exceptionally the AKQ .
3NT	16 ⁺ HCP, all other suits stopped. Normally indicates a solid
	minor with a singleton or void in opener's suit. E.g., bid
	3NT with $\blacktriangle K4 \heartsuit 2 \diamondsuit AKQJ876 \clubsuit K76$ over an opening $2\heartsuit$.
4♣ ‡	Roman key-card ask with modified responses since opener
	cannot have 3 or 4 key cards. \Rightarrow

9 Responses to 2NT

Opener is showing a balanced hand with 22-23HCP. Note that the rebids after a 3 \clubsuit response differ from those after 1 \clubsuit -1 \diamondsuit -2NT because here, responder is not limited to 0-7HCP and slam is a possibility. Responses are:

Pass	Very weak, no suit to escape to.	
3NT	To play.	
3♣†	Smolen Stayman—asking for majors (implies at least one four	
	card major). Game-going with slam interest. Responses are:	
	3♦† No 4-card major. Responder's rebids:	
	$3 \heartsuit$ 4-card \heartsuit and 5-card \spadesuit (allows for 5-3	
	fit).	
	3 ♠ 4-card ♠ and 5-card \heartsuit (allows for 5-3	
	fit).	
	3NT To play (no five-card major).	
	$3\heartsuit$, $3\spadesuit$ 4-card major.	
	3NT 4 cards in both majors. Responder bids:	
	Pass To play.	
	$4\diamondsuit$, $4\heartsuit$ Transfer to $4\heartsuit$ or $4\spadesuit$ respectively.	
3♦†, 3♥†	Transfer to $3\heartsuit$ or $3\spadesuit$ respectively.	
	With 5-5 in the majors, responder bids 3♠ after a transfer to	
	hearts. With 5-4 (four hearts), he bids 4% after a transfer to	
	spades. Bidding 3NT asks opener to pass or bid four of the	
	major holding 3-card support.	
3♠†	Minor suit slam try. Opener bids $4\clubsuit$ (corrected to $4\diamondsuit$ if needed).	
4♣ †	Minor two-suiter. $4\diamondsuit$ sets diamonds, any other bid agrees clubs.	
4♦† 4♥†	Transfer to $4\heartsuit$ or $4\spadesuit$ respectively. 6^+ -card suit, to play.	
- -	realisted to 1, of the respectively. O called state, to pray.	

10 Responses to 3-level Preempts

A preempt at the 3-level is made with less than 10 HCP and at least a 7-card suit with a suit quality of 8 (or 9 when vulnerable) and obeying the rule of 2/3/4. In general, it is expected that opener will not have a four-card major and have two or more good honours in his suit with not more than one useful honour in a side suit. Unless partner makes a forcing response, the opener is not expected to bid again.

Responses are based on playing strength (additional tricks that responder can provide) rather than high card points:

Pass	No support, no suit of one's own, at best can provide 2 or 3
	tricks.
Raise	Could be preemptive with 3-card support or with good cards
	in side suits that can provide four tricks or more.
$New\ suit \dagger$	6 ⁺ -card suit, good playing strength since this forces opener
	to respond. Opener should raise the suit with two or three
	trumps.
3NT	Natural, good controls in side suits, good chance of taking 6-7
	tricks in opener's suit even with the known problems of entries
	in dummy.

11 Responses to 3NT

The "gambling" 3NT bid shows a solid 7^+ -card minor suit (AKQ or better) and no outside ace or king. Responses are:

Pass	To play, stoppers in side suits.	
4♣	Escape—asks opener to pass or bid $4\Diamond$ if that is his suit.	
$4 \diamondsuit \dagger$	Asks opener to bid a singleton or void if he has one. Responses:	
	$4\heartsuit\dagger$, $4\spadesuit\dagger$ Singleton or void in the bid suit.	
	4NT† Singleton or void in the other minor.	
	$5\clubsuit$, $5\diamondsuit$ Shows that minor and denies a singleton	
	or void.	
$4\heartsuit, 4\spadesuit$	Natural, to play.	
4nt	Quantitative, asking opener to bid 6NT with extra length or an extra trick outside (such as Qxx).	
5♣	Sign-off and weak. Opener should correct to $5\diamondsuit$ if that is his suit.	
5\$	Also a sign-off but responder indicates he knows opener's suit is diamonds and it would be advantageous to play from his side.	
5nt†	Grand Slam try showing no losers outside the trump suit but indicating a void in opener's suit. If opener is completely solid (e.g., $AKQJ$ to seven card), he bids 7 otherwise he bids 6.	
6♣	Asks opener to pass or correct to $6\diamondsuit$. This could be a tactical bid.	

Examples of bidding after a 3NT opening. \Rightarrow

12 Responses to Namyats

The Namyats convention (Stayman spelt backwards) shows a long (normally eight cards) semi-solid (not missing both ace and king) major suit with eight or more playing tricks and playing strength concentrated in the trump suit. The bid is meant to be constructive rather than preemptive and allows you to distinguish hands that are close to game versus purely preemptive openings.

 $4\clubsuit$ shows hearts and $4\diamondsuit$ shows spades. With a weaker hand, the preemptive bids of $4\heartsuit$ or $4\spadesuit$ would be used instead.

Responses are:

$4\heartsuit, 4\spadesuit$	Bidding game in partner's suit is a sign-off with no slam interest
	(responder wants to be declarer).
$4 \diamondsuit \dagger, 4 \heartsuit \dagger$	The next step above opener's bid is a relay asking him to bid
	his suit (\heartsuit or \spadesuit). After opener bids his suit, any new suit bid
	by responder is a cue-bid. Responder passes if he does not have
	slam interest but wants his hand to be dummy.
4NT†	$Roman\ key\text{-}card\ Blackwood. \Rightarrow$
$Suit \dagger$	ϵ suit control-asking bid. A compressed scale of responses is
	used (note that the steps skip over NT because that has a special
	meaning):
	Cheapest NT Guarded king in suit. When you have am-
	ple tricks elsewhere, this allows you to de-
	clare an NT contract from the correct side.
	1 step No first or second round control.
	2 steps Second round control—any singleton.
	3 steps First round control—void or ace.
	A repeat ask in the same suit asks for third round control,
	i.e., a doubleton or guarded queen. Responses are -1^{st}
	step: no control, 2^{nd} step: doubleton and 3^{rd} step: guarded
	queen.

Examples of bidding after a *Namyats* opening.⇒

13 Competitive Bidding

In general, overcalls in a suit are made with a hand of 8-15HCP and a good suit—the higher the level of the overcall, the stronger the hand in terms of playing strength (longer suit / higher point range). Jump overcalls are always weak or preemptive. An overcall in no-trumps, however, shows the equivalent of an opening no-trump bid with a stopper in the opponent's suit.

Takeout doubles are made with an opening hand or better (12^{+} HCP) and must have tolerance for all the unbid suits. The only exception is when you have a powerful hand of 16^{+} HCP when you should double for takeout and bid your suit over partner's forced response. A double of 1NT is <u>not</u> a takeout double (you cannot have tolerance for all four suits) and has special meanings described below.

13.1 Overcalls

Overcalls over an opponent's opening of one of a suit carry the following meanings:

$Non ext{-}jump$	8-15HCP, good 5 ⁺ -card suit (11-15HCP, 6 ⁺ -card suit at	
overcall 2-level). Opener's responses are:		
	With support	for partner's suit
	$\overline{Single\ raise}$	8-9HCP, 3^+ -card support.
	$Jump\ raise$	Weak, 5-8HCP, 4^+ -card support, pre-
		emptive.
	$Game\ raise$	Hand good enough for game or weak
		and preemptive with 5-card support.
	$Cue ext{-}bid\dagger$	9 ⁺ HCP, 4 ⁺ -card support (or 10 ⁺ HCP
		with 3-card support).
		If the overcaller shows a minimum
		by rebidding his suit, responder
		can pass with 9-11HCP, raise with
		12-14HCP and cue-bid again with
		15 ⁺ HCP.
	Without suppo	ort for partner's suit
	$\overline{New\ suit}$	5 ⁺ -card suit, non-forcing.
	Jump in suit	11-13HCP, 6 ⁺ -card suit, non-forcing.
	1 _{NT}	8-11HCP with stopper in opponent's
		suit.
	2NT	12-15HCP with stopper in opponent's
		suit.
	3NT	16 ⁺ HCP with stopper in opponent's
		suit.
	$Cue ext{-}bid\dagger$	Strong hand with interest in game.
		To distinguish from the case with
		support for partner's suit, responder
		will rebid NT or jump in a new suit
		on his next bid.
Jump overcall	0-10HCP, preen level).	nptive with 6^+ -card suit (7-card at 3-

1nt	14-16HCP, stopper in opponent's suit. Responses (includ-
	ing Stayman and transfers) are the same as over a 1NT
	opening. Stronger balanced hands should open with a
	takeout double followed by an NT bid.
Cue- bid	Michael's cue-bid showing a two-suiter in the highest
	ranking unbid suit and another. \Rightarrow
$Jump \ to \ 2$ nt	Unusual no-trump showing a two-suiter in the two lowest
	ranking unbid suits. \Rightarrow

13.2 Doubles

A double of opponent's opening of one of a suit is either 12-15HCP with tolerance for any unbid suit or a power double with 16⁺HCP. A double of an opponent's minor opening bid usually shows 4-4 in the majors and over a major suit opening, it normally promises a 4-card suit in the other major. A response must be made even with a blank hand unless the other opponent bids.

Responder's bids:

Suit	0-8HCP, may be only four cards (forced response). Dou-
	bler should pass with a minimum, raise and invite with
	support and 15-17HCP or bid a new suit or no-trumps
	with 18 ⁺ HCP.
Free bid or jump	9-11HCP. Doubler should compete with 12-14HCP, force
$in \ suit$	game with 15-17HCP and bid a new suit or no-trumps
	with 18^+ HCP.
$Cue ext{-}bid\ddagger$	Strong hand, forcing to game.
1nt	6-9HCP, stopper in opponent's suit, non-forcing.
2NT	10-11HCP, stopper in opponent's suit, invitational.
3nt	Values for game, no interest in slam. Doubler can check
	aces and try for slam with 18 ⁺ HCP.

Doubles following a weak two opening

Over a double of a weak two opening (or when RHO raises opener's suit to the two level in an auction such as $(1\heartsuit)-Double-(2\heartsuit)-???$) the responses are:

Pass	(Only when <i>RHO</i> has bid) Weak, 0-7HCP.
2 of suit	Weak, 0-7HCP.
2NT† or 3 of a suit†	$lebensohl$ convention. \Rightarrow

Negative doubles

A negative double after an opponent's overcall of one of a major implies possession of four cards in the other major and sufficient values to justify a response. Responder is also expected to have mild support either for the unbid minor or for partner's suit. At the two or three-level, it implies that the hand is playable in either of the unbid suits and possibly even partner's suit at the level he will be forced to bid. Sometimes, responder may make a negative double with a single-suited hand when he has insufficient high-card strength to make a forcing bid in his suit.

Examples:

Bidding	Sample hand	
$1 \diamondsuit - (2 \clubsuit) - Double$	Reasonable major suit holdings	♦ KJ105 ♥QJ107
	and strength to play at two-level.	♦Q109 ♣ 64
$1 \spadesuit - (2 \heartsuit) - Double$	Reasonable minor suit holdings	♦ J10 ♥85
	and sufficient values to play at	♦QJ1043 ♣AJ109
	3-level.	
$1 \diamondsuit - (1 \spadesuit) - Double$	Four hearts with at least 8HCP.	♠ 87 ♥KQ103
		♦J104 ♣Q1092
$1 \diamondsuit - (1 \spadesuit) - Double$	$2\heartsuit$ cannot be bid since it would	♠ 87 ♥AQJ1095
	imply values for a two-over-one	♦1096 ♣J10
	response. The solution is to use a	
	negative double and rebid hearts.	

Note that in the sequence, $1\lozenge-(1\heartsuit)$, responder should bid $1\spadesuit$ holding four spades rather than double.

Openers rebids after partner's negative double are as follows:

Pass	For penalties (see below).
$With\ a\ minimum$	hand (11-13HCP)
New suit	Shows fit in responder's implied suit (especially if a
	major).
$Rebid\ own\ suit$	Shows 6^+ -card suit (or a strong 5-card suit).
Cheapest nt	No suit worth bidding, stopper in opponent's suit.
With a maximum	hand (14-15 HCP)
Jump shift	Invitational but non-forcing.
$Jump\ rebid$	Shows a good 6 ⁺ -card suit, invitational.
Jump in NT	Stopper in opponent's suit, ready source of tricks.
$Cue ext{-}bid\dagger$	Shortness in opponent's suit and by inference, support
	for doubler's suits.

Opener can also *pass* for penalties after a negative double although this is rare since it implies opponents have bid opener's good suit. For example, after $1\lozenge-(2\clubsuit)-Double$, opener could pass with $\spadesuit5$ \heartsuit A76 \diamondsuit AKJ3 \clubsuit Q10942 or $\spadesuit983$ \heartsuit Q \diamondsuit AK865 \clubsuit KQJ9 (but not with \spadesuit Q1065 \heartsuit 9 \diamondsuit AK10 \clubsuit K1032 where the correct bid would be to support one of partner's implied suits with $2\spadesuit$).

Responsive and Lightner doubles

A double in a competitive auction is a *responsive double* indicating 3-card support in partner's suit.

A double of a slam contract is a $Lightner\ double$ requesting an unusual lead from partner.

13.3 Defence against a no-trump opening

Doubles and overcalls over a 1NT opening have different meanings depending on whether the opponents are playing a strong no-trump or a weak no-trump. For our purposes, a strong no-trump is one whose point range includes 15^+ HCP.

After a strong no-trump opening

Over a strong no-trump opening, we use the *Meckwell* convention. This set of responses is also used when intervening after having passed once (since a penalty double is no longer meaningful).

\overline{Double}	Single-suited minor or major two-suiter (5-4 or better but	
Double	ů ·	
	normally 5-5). Responder can then bid:	
	$2 \stackrel{\triangleright}{\Leftrightarrow} \dagger$ Asks partner to clarify his hand (rebids $2 \heartsuit$	
	with major two-suiter, else $2 \diamondsuit$ or $3 \clubsuit$).	
	Pass Good hand, for penalties.	
	Suit Good suit, natural.	
$2\clubsuit$, $2\diamondsuit$	Two-suiter—the suit bid and a major suit. Responder can bid:	
	Pass To play.	
	2 \heartsuit Ask partner to pass or correct to 2 \spadesuit .	
	New suit Natural.	
	Raise Preemptive, weak.	
	2NT† Game interest, see below.	
$2\heartsuit$, $2\spadesuit$	Natural, 6+-card suit or an excellent 5-card suit.	
2NT	Minor two-suiter or a big hand. Partner should bid his better	
	minor. With a big hand, bidding continues naturally.	

2NT after 24, 2 \diamondsuit (or after Double-(Pass)-24-(Pass)-2 \heartsuit) shows game interest and partner rebids as follows:

After 24	
3 ♣	Minimum hand.
$3\diamondsuit$, $3\heartsuit$,	Maximum hand, second suit.
3♠	
After $2 \diamondsuit$	
3♣	Minimum hand, diamonds and hearts.
$3\diamondsuit$	Minimum hand, diamonds and spades.
3♡, 3♠	Maximum hand, second suit.
After (1 N	T) $-Double$ -2 \$ -2 \bigcirc -2 NT
3♣	Minimum, hearts longer than spades.
$3\diamondsuit$	Minimum, spades longer than hearts.
$3 \heartsuit$	Maximum, hearts longer than spades.
3♠	Maximum, spades longer than hearts.

After a weak no-trump opening

The Cappelletti system is employed over a weak no-trump. As compared to the Meckwell convention, this has the advantage of retaining a double for penalties.

Double	Strong hand (normally equal strength), for penalties.
$2\clubsuit\dagger$	Any one suited hand $(6^+$ -cards). Responder bids $2\diamondsuit$ to ask
	partner to name his suit.
$2\diamondsuit\dagger$	Two-suiter—both majors.
$2\heartsuit$, $2\spadesuit$	Two-suiter—hearts/spades and one minor. 2NT asks for the
	minor suit.

2 NT \dagger	Two-suiter—both minors.
3 of suit	Intermediate hands with 13-16HCP and 6 ⁺ -card suit.

After a $2\clubsuit$ overcall, any bid other than $2\diamondsuit$ is natural and non-forcing. Responder may pass $2\clubsuit$ with 6^+ clubs and a void elsewhere (likely to be partner's suit ©).

After (1NT)-2 \diamondsuit -Pass-???, responder can jump in a major suit to invite game or pass with 6^+ diamonds and a disaster in the majors.

14 Gadgets and Conventions

14.1 β control-asking bid

A β control-asking bid can occur either after a 1NT rebid by the 1\$\mathbb{A}\$ opener over a positive suit response or by cue-bidding a singleton suit after a positive response of 3\$\mathbb{A}\$, 3\$\infty\$, 3\$\infty\$, 3\$\mathbb{A}\$, 4\$\mathbb{A}\$ or 4\$\infty\$ over 1\$\mathbb{A}\$.

The number of controls held (A=2, K=1) are shown in steps as below:

1 step	0-2 controls. A relay bid by opener in the cheapest suit over	
	the 1-step response will then ask for clarification with responses	
	in steps:	
	1 step No controls.	
	2 steps 1 control.	
	3 steps 2 controls.	
$2\ steps$	3 controls.	
$3\ steps$	4 controls.	
4 steps	5 controls.	

When responder has already shown controls as less than four or at least four, e.g., after an unusual positive, a modified scale of responses is used as follows:

$Known\ to\ have$	0-3 $controls$	4^+ controls
1 step	No controls.	4 controls.
$2\ steps$	1 control.	5 controls.
$3 \ steps$	2 controls.	6 controls.
4 steps	3 controls.	7 controls.
$5\ steps$		8 controls.

14.2 γ trump-asking bid

The γ trump-asking bid is used to determine the quality of responder's suit, i.e., whether the suit will provide enough tricks in no-trumps or as a trump suit.

Responses to a γ trump-asking bid		
1 step	No top honour, 5 ⁺ -card suit.	
$2\ steps$	5-card suit, 1 honour.	
$3\ steps$	5-card suit, 2 honours.	
4 steps	6-card suit, 1 honour.	
$5\ steps$	6-card suit, 2 honours.	
$6\ steps$	AKQ of suit, 5^+ -card suit.	

The γ bid may be repeated to get clarification on the first response.

$Honours\ already\ shown$	Responses	s to repeat γ -ask
	$1 ext{ step}$	7 ⁺ -card suit
Zero or AKQ	2 steps	6-card suit
	$3 { m steps}$	5-card suit

	1 step	Ace
One	2 steps	
	3 steps	Queen
	1 step	AK
Two	2 steps	AQ
	3 steps	KQ

14.3 ϵ suit control-asking bid

The ϵ asking bid is used to find out what controls the responder holds in a specific suit. It follows a γ asking bid and terminates only when trumps or no-trumps is bid, i.e., any other suit bid is an ϵ -ask in that suit. Responses are in steps:

Responses to a epsilon suit control-asking bid

1 step	No control—Jxx or worse.
$2\ steps$	Third round control— Q or doubleton.
$3 \ steps$	Second round control— K or singleton.
4 steps	First round control— A or void.
$5\ steps$	AK or AQ .

The ϵ -ask can be repeated if it is important to know whether the control is based on shortness or strength. The response is again in steps—the first step showing that the previous response was based on *shortness* and the second step showing *strength*.

If the first ϵ bid is at the level of $5\clubsuit$ or higher, a compressed scale of responses is used where the first step shows no control, second step shows second-round control and the third step shows first-round control.

14.4 Bergen raises

After a $1\heartsuit$ or $1\spadesuit$ opening, responses of $3\clubsuit$, $3\diamondsuit$, $3\heartsuit$ and $3\spadesuit$ show different types of 4-card support. The mnemonic CLAP (Constructive, Limited and Preemptive) helps to remember the order of the bids.

1♡-3♣	Constructive, 7-10HCP, 4-card \heartsuit .
1♡-3♦	Limited, 10-12HCP, 4-card \heartsuit .
1♡-3♡	Preemptive, 0-6HCP, 4-card \heartsuit .
1♠-3♣	Constructive, 7-10HCP, 4-card \spadesuit .
1♠-3♦	Limited, 10-12HCP, 4-card \spadesuit .
1♠-3♡	Spare bid—used to show a strong 12 ⁺ HCP hand with 4-card
	support and an undisclosed singleton/void.
1♠-3♠	Preemptive, 0-6HCP, 4-card \spadesuit .

14.5 Gerber ace-asking convention

An immediate response of $4\clubsuit$ to any no-trump bid (or overcall) is the *Gerber* ace-asking convention. A jump rebid of $4\clubsuit$ in response to a natural no-trump bid is *Gerber* as also when a trump suit has not been identified and no-trumps

has been rebid. Gerber should not be used holding a void. Opener shows the number of aces held in steps as follows:

$4\Diamond$	Zero or four aces.
4 %	One ace.
$4\spadesuit$	Two aces.
4NT	Three aces.

14.6 Jacoby transfers

After a 1NT opening, responder bids $2\lozenge$ with a 5-card or better heart suit and $2\heartsuit$ with spades. Opener will bid $2\heartsuit$ or $2\spadesuit$ so that the strong hand becomes declarer. Responder's rebids are:

Pass	A weak hand with 5^+ -card \heartsuit or \spadesuit .
	•
$2\spadesuit$	Invitational with 5-5 in the majors after 1NT-2 \diamondsuit -2 \heartsuit .
2NT	Balanced or semi-balanced hand with a 5-card major.
	Invitational—partner can pass or sign-off in 3 of a major
	or bid 3nt.
3 ♣ ‡, 3♦‡	4-card suit in addition to 5-card major.
Raise	6-card suit, invitational.
3♡‡	(After $2\spadesuit$) 5-5 in the majors with slam interest. Stronger
	than an immediate jump to $4\heartsuit$.
3♠ ‡	(After $2\heartsuit$) Singleton or void with slam interest.
3nt	Balanced or semi-balanced hand. Partner can pass or
	correct to 4 of major.
$4\heartsuit$	(After 2♠) 5-5 in majors with no slam interest. Partner
	can pass or correct to $4\spadesuit$.
$Double\ raise$	6 ⁺ -card major, sign-off.
4NT	Quantitative, inviting slam in major or no-trumps.

Super-acceptance of a transfer

Opener could *super-accept* the transfer with a 4^+ -card holding in the transfer suit. In this case, he can break the transfer and show any doubletons. For example, after 1NT-2 \heartsuit (transfer to 2 \spadesuit), opener with a 4-card spade suit could bid:

2NT [†]	4=3=3=3 shape.
3♣†	4=x=x=2 (doubleton club).
$3\diamondsuit\dagger$	4=x=2=x (doubleton diamond).
3♡†	4=2=x=x (doubleton heart).
3♠	4 spades, any other distribution.

14.7 Jacoby 2NT

A 2NT response over an opening of $1\heartsuit$ or $1\spadesuit$ is conventional and shows 12^+ HCP with 4^+ -card support of partner's suit and is forcing to game. Opener's rebids are:

New suit	Singleton or void in suit bid.
Rebid of suit at 3-level	Maximum strength hand.
Jump shift	Good 5 ⁺ -card side suit.
Game in original suit	Minimum opening, sign-off.
3NT	12-13 HCP, medium strength hand.

14.8 lebensohl Convention (over weak two)

The *lebensohl* convention is used to respond to partner's takeout double of a weak two opening. This system is geared to show weak, invitational and strong hands without consuming too much bidding room.

2nt†		tner must bid 3. Over partner's forced re-
	sponse, responder bids:	
	Pass	0-7HCP, sign-off in clubs.
	$3\diamondsuit$, $3\heartsuit$, $3\spadesuit$	0-7HCP, correction to longest suit when not clubs, sign-off.
	$Cue ext{-}bid\ddagger$	4 ⁺ -cards in unbid major (or one of the majors if double was over two of a minor), confirms stopper in opponent's suit.
	3nT‡	Denies 4 ⁺ -cards in majors, confirms stopper in opponent's suit.
3♣, 3♦, 3♥, 3♠	8-11HCP, 4 ⁺ -card suit, invitational.	
$Cue ext{-}bid\ddagger$	4 ⁺ -cards in unbid major (or one major if double was over 2 of a minor), no stopper in opponent's suit.	
3 NT \ddagger	Denies 4 ⁺ -cards in majors, no stopper in opponent's suit.	

lebensohl applies even when RHO raises opener to the 2-level e.g., over the sequence $(1\spadesuit)-Double-(2\spadesuit)-???$. In this case, since responder is not forced to bid, with the weak 0-7HCP hands, responder wil pass. The suit bids after the 2NT-3\$\mathbb{\chi}\$ sequence now become invitational hands and the direct raises to three of a suit become game forces.

14.9 lebensohl convention (after 1NT)

A different *lebensohl* convention is used by responder after an opponent overcalls partner's opening 1NT opening in order to compete further without necessarily committing to game. It is initiated after the right-hand opponent makes a suit overcall at the two-level.

New suit at 2-level	Natural and non-forcing.
2NT [†]	A puppet bid requiring opener to bid 3. After opener's forced 3. bid,

	— 3 of a lower ranking suit than overcaller's is natural,
	to play.
	— 3 of a higher ranking suit than overcaller's is
	natural and invitational.
	-3 of the opponent's suit is artificial asking opener
	to bid a 4-card major and showing a stopper in op-
	ponent's suit.
	— 3NT is natural, to play, and shows a stopper in
	the opponent's suit.
$New\ suit\ at$	Natural and forcing to game.
3 -level \ddagger	
$Cue ext{-}bid\dagger$	Artificial—asks opener to bid a 4-card major and denies
'	a stopper in opponent's suit.
3NT	Natural, to play, and denies a stopper in opponent's suit.

14.10 Michael's cue-bid

A cue-bid in the opponent's suit after they have opened the bidding is conventional and shows a two-suited hand (5-5 or better). Over a minor-suit opening (i.e., $2\clubsuit/2\diamondsuit$) shows a major two-suiter and over a major-suit (i.e., $2\heartsuit/2\spadesuit$), it shows the unbid major and an unspecified minor.

After a cue-bid o	f 2 4 /2\$
$2\Diamond$	Natural, showing a very good 6 ⁺ -card suit. Tends to
	deny 3 cards in either major. Non-forcing.
$2\heartsuit$, $2\spadesuit$	Non-forcing sign-off. With support for both majors, bid
	$2\heartsuit$.
2nt	Natural, invitational.
$3 \updownarrow \uparrow$, $3 \diamondsuit \uparrow$	When not a cue-bid, shows a very strong 6-card suit.
$Cue ext{-}bid\dagger$	Artificial, shows game or slam interest.
$3\heartsuit, 3\spadesuit$	Preemptive, usually with 4-card suit in accordance with
	the Law of Total Tricks. Non-forcing.
3nt	Natural, sign-off. Shows a big, balanced hand with no
	interest in a major-suit game. Rare.
After a cue-bid of	f 2♥/2♠
2♠	Over $2\heartsuit$, is a sign-off.
2 NT \dagger	Asks opener to bid his minor suit. Made on a variety of
	hands but is usually to sign-off in $3\clubsuit$ or $3\diamondsuit$ with support
	in both minors.
3 ♣ , 3♦	Natural, 6 ⁺ -card suit—opener probably has the other
	minor. Non-forcing.
3 %	Over 2♠, natural sign-off.
3♠	Over $2\heartsuit$, preemptive with 4-card suit.
Cue - $bid\dagger$	Artificial showing game or slam interest.

If responder raised the cue-bid, e.g., $(1\heartsuit)-2\heartsuit-Pass-3\heartsuit$, the Michael's cue-bidder is expected to bid his cheapest suit (in this case, $3\spadesuit$) with a weak hand of 0-10HCP. All other bids show 10^+ HCP and are game forcing.

14.11 Roman key-card Blackwood

A Roman key-card Blackwood bid of 4NT is used to enquire about the number of key cards (any ace or the trump suit king) in partner's hand. It should not be used when you have a void or two fast losers.

Responses are in steps and differ slightly (when holding all five key cards) depending on whether opponents have doubled or overcalled over 4NT.

Holding	Silent	Double (ROPI)	Overcall (DOPI)
1/4 key cards	5♣	Redouble	Double
0/3 key cards	$5\diamondsuit$	Pass (0/3/5 key)	Pass (0/3/5 key)
		cards)	cards)
2/5 key cards (no	5♡	$5 \clubsuit (\underline{\text{two}} \text{ key cards})$	Cheapest suit ($\underline{\text{two}}$
$queen \ of \ trumps)$			key cards)
2/5 key cards with	5 ♠	$5 \diamondsuit (\underline{\text{two}} \text{ key cards})$	Second-cheapest suit
queen of trumps			$(\underline{\text{two}} \text{ key cards})$

When holding a void, after a trump suit is agreed, jumping to another suit at the 4 or 5 level in the void suit initiates a *key card exclusion* asking bid. Partner shows his key cards *excluding* any in the void suit in steps.

1 step	1 or 4 key cards.
$2\ steps$	0 or 3 key cards.
$3\ steps$	2 key cards without trump Q.
4 steps	2 key cards with trump Q.

Asking for the Trump Queen

After a $5\clubsuit$ or $5\diamondsuit$ response to the 4NT RKCB bid, bidding the cheapest non-trump suit asks about the trump queen. Responses to the queen-ask are:

Trump suit	No trump queen.
Non-trump $suit$	Trump queen and king in suit bid.
5nt	Trump queen without any side-suit kings.

Asking for Kings

A 5NT rebid following RKCB asks for any kings held. It is a grand slam try, and should only be bid if the partnership holds all 5 key cards and the queen of trumps.

Partner will respond by bidding his cheapest king.

Modified RKCB (4 \clubsuit over $2\heartsuit/2\spadesuit$)

A bid of $4\clubsuit$ is used to ask for key cards after either an opening weak two bid or a weak two response to a $1\clubsuit$ opening. The response structure is based on regular RKCB taking into account the fact that the responder cannot have more than two key cards. The responses are slightly different depending on whether the suit is hearts or spades.

When spades are trumps, the 1^{st} step $(4\diamondsuit)$ shows 0 or 2 key cards, the 2^{nd} step $(4\heartsuit)$ shows one key card without the $\spadesuit Q$ and the 3^{rd} step $(4\spadesuit)$ shows one

key card with the $\spadesuit Q$. If partner signs off in $4\spadesuit$ after a 0/2 response, opener bids 4NT holiding the $\spadesuit Q$ allowing responder to push on to slam if possible.

When hearts is the agreed suit, the 1^{st} step $(4\diamondsuit)$ shows 0 or 2 key cards and the 2^{nd} step $(4\heartsuit)$ shows 1 key card. If partner wants to ask about the $\heartsuit Q$, he bids $4\spadesuit$. Without the queen, opener signs off in $5\heartsuit$ otherwise he bids another suit showing a side suit king or 5NT with no side suit king.

14.12 Stayman convention

The *Stayman* convention is used to find a 4-4 major suit fit after a 1NT opening by bidding 2. Opener responds with one of:

$2\Diamond$	No four card major.
$2 \heartsuit$	4-card heart suit, may have 4-card spades.
$2\spadesuit$	4-card spade suit, no 4-card heart suit.

Puppet Stayman

Used over a 2NT bid that may be made with a 5-card major, 3♣ is a conventional bid that endeavours to find a major suit fit. Responses are:

3\$	No five card major but at least one four card major. Responder
	with one four card major should bid the major that he does
	not have and if there is a 4-4 fit, opener will bid it.
$3 \heartsuit$	5-card heart suit.
3♠	5-card spade suit.
3NT	No 4 or 5-card major. Responder can bid $4\clubsuit$ or $4\diamondsuit$ to transfer
	to $4\heartsuit$ or $4\spadesuit$ respectively when he has a six-card major.

14.13 Unusual 2NT

A jump to 2NT over opponent's opening of one of a suit is conventional and shows a two-suited hand in the two lowest ranking unbid suits. E.g., a 2NT overcall of a 14 opener shows hearts and diamonds. The *unusual* 2NT is possible even when both opponents bid.

For example, $(1\heartsuit)$ –Pass– $(1\spadesuit)$ –2NT shows 5^+ clubs and 5^+ diamonds. There is an overlap with the Michael's cue-bid in this case since a cue-bid of $2\heartsuit$ would also show the same shape.

As another example, $(1\clubsuit)-Pass-(1nt)-2nt$ would show 5^+ hearts and 5^+ diamonds.

Responder's bids:

Better	Longer of overcaller's two suits. With equal length in both
suit	suits (especially with two doubletons), bid the cheapest suit.
Jump	4-card support for suit, preemptive, non-forcing.
$Cue ext{-}bid$	Support for at least one of partner's suits and interest in game
	or slam. Asks 2NT bidder to bid the cheapest suit with 0-10HCP
	or to make any other bid with 10^+ HCP.

 4^{th} suit Bidding the suit not shown by partner or opponent shows a 6^+ -card suit, a decent hand and no support for either of partner's suits.

All raises by the 2NT bidder are natural and non-forcing. All other bids show a very good hand in terms of points and/or shape but with the exception of a cue-bid, are non-forcing.

15 Miscellaneous

High-card Points (HCP) are assigned as follows—Ace=4, King=3, Queen=2 and Jack=1. Once a trump-fit has been found, distribution points can be assigned—Void=3, Singleton=2, Doubleton=1.

Singleton honours should be counted only once (either HCP or shortness).

Suit Quality (sq) is calculated as suit length plus number of honours in the suit. The Jack or Ten should be counted only if a higher ranking honour is held. For example, a holding of K-J-9-5-4 would have 7sq but J-10-9-5-4 would have 5sq.

For an overcall, the SQ should equal or exceed the number of tricks bid (e.g., SQ of 8 for a 2-level overcall).

When preempting, the SQ should equal the level of preempt when vulnerable and can be one less when non-vulnerable.

Rule of 2/3/4 When preempting, the expected number of undertricks should be no more than two with unfavourable vulnerability, three with equal vulnerability and four with favourable vulnerability.

For example, a $3\diamondsuit$ preemptive bid is made when expecting to take at least seven tricks in the case that the opening bidder is vulnerable facing non-vulnerable opponents.

The Losing Trick Count (LTC) is used only once a trump suit has been established. Count losers only in the top three cards of the suit holding—there are never more than 3 losers in a suit. With three or more cards, A/K/Q are not losers but any lower card is a loser. With two cards, only A or K are not losers.

Add your and partner's loser count and subtract from 24 to estimate the number of tricks that can be won. You can estimate your partner's LTC as follows:

HCP	Expected Losers
7-9	8-9 losers (9)
10-12	7-8 losers (8)
13-15	6-7 losers (7)
16-18	5-6 losers (6)
19-21	4-5 losers (5)
22+	4 losers or less

16 Bidding Examples

16.1 Negative response to 1♣

After a $1 \diamondsuit$ response, there is no temptation to get too high on misfitting hands. For example,

\mathbf{West}	East	West	East
4	♠ K J 10 7 5 3	1♣	$1\diamondsuit$
\heartsuit A K 9 5 4	\heartsuit 6 2	$1 \heartsuit$	$1 \spadesuit (1)$
♦ A J 4	\Diamond 7 5 3	2 4 (2)	$2\spadesuit(3)$
♣ K O 10 9	4 5 4	` ′	` ´

- (1) 4-7HCP, 4+-card suit.
- (2) Shows minimum with second 4-card suit (implies 5 hearts).
- (3) 6-card suit, no fit.

Opener shows discipline and passes recognising misfit and no chance for game.

A $1\diamondsuit$ response does not rule out game. With a 2-suited hand, it is easy to find a game contract when the fit is in the second bid suit.

West	\mathbf{East}	West	East
♠ A K 7 5 2	\spadesuit 4	1♣	$1\Diamond$
\heartsuit A Q 10 4 3	\heartsuit K 8 5 2	$1 \spadesuit$	1NT(1)
♦ A 5	\Diamond 9 6 4 2	$2 \heartsuit$	3 %
4 2	♣ J 7 5 4	$4 \heartsuit$	

(1) As he has already limited his hand, East is not afraid to improve the contract. After that, all goes smoothly.

Suppose the lead against $4\heartsuit$ is a low diamond. The best technique for declarer is to win with the Ace, cash \triangle A and ruff a spade with a low trump. Then he plays a club to establish communication between the two hands.

The opponents will probably continue diamonds. West ruffs the third round and leads another low spade, ruffing with the $\heartsuit 8$. If, at worst, spades are 5-2 and South overruffs, declarer retains the possibility of ruffing the other spade loser with the $\heartsuit K$. The contract will fail only against very unlucky distribution.

With a powerful hand, opener would jump rebid his suit and responder would know there is a game or slam on if he is in the upper range. For example,

West	East	West	East $1 \diamondsuit$
♠ A K J 8 7 5 3 ♡ A	♠ 6 4 2 ♡ J 7 3	1♣ 2♠(1)	$3\diamondsuit(2)$
∨ A◇ K 7 2		3♠(3)	4
♣ A Q	♣ 8 6 5	4NT 6♠	5 ♣ (4)

- (1) 22+HCP, 5-card suit.
- (2) 4-7HCP, showing side-suit before showing fit in spades.
- (3) After the new suit bid at the 3-level, opener knows he will not be left in 3.
- (4) One key card.

After a heart lead and assuming trumps don't break worse than 2-1, the contract can be made without the club finesse by playing A and K of diamonds followed by a low diamond towards the J. This works whenever diamonds break 3-3, $\Diamond Q$ is held by North or is a doubleton with South.

With a balanced hand, opener will rebid NT. For example,

\mathbf{West}	East	West	East
♠ K 6 3	♠ AJ742	1♣	$1\Diamond$
♡ K J 10	\heartsuit 7 5 4	1NT(1)	$2\heartsuit(2)$
♦ A 8 6 2		2♠	2NT(3)
♣ A K 3	4 10 4	3NT(4)	` ′

- (1) 17-19HCP, balanced.
- (2) Weak transfer to 2.
- (3) Balanced hand, invitational.
- (4) With 18HCP and three cards in spades, East tries for game in no trumps.

North leads the $\heartsuit 3$, South plays the Queen and West the King. After this favourable opening, West can afford to make a safety play in spades. He plays King and another, North following suit with low cards. To make absolutely sure of four tricks, even when North holds Q10xx, declarer ducks in dummy. He makes game with four spades, two hearts and three top tricks in the minors.

Even with a weak two-suiter, Precision enables finding slams with relatively low point counts following a negative response. For example,

\mathbf{West}	\mathbf{East}	West	East
♠ A 8 5 4	♠ 6	1♣	$1\diamondsuit$
\heartsuit A K 9 4 3	\heartsuit J 8 7 6 5 2	$1 \heartsuit$	$3\spadesuit(1)$
♦ A K J 8	\Diamond Q 9 7 6	4♣	$4\heartsuit(2)$
. —	♣ 6 4	6 %	

- (1) Splinter showing 4-card or better support in hearts and a singleton or void in spades.
- (2) Responder could conceivably also bid 5% with the 6-card suit.

With a combined total of 22 points, although 13 tricks are available if the opening lead is not ruffed, most pairs will probably stop in 6% after the splinter bid using a sequence similar to the one above.

16.2 Positive response in a suit over 1♣

Using Precision, game is always reached after a positive response to a $1\clubsuit$ opening. The partnership will have a minimum of 24 points if opener is unbalanced (16 vs 8) or 25 points if he is balanced (17 vs 8). This works well in practice, for example:

West	\mathbf{East}	West	East
♠ A K J 8 6	♠ Q 9 2	vvest 1♣	East 1NT
\heartsuit 6 4	\heartsuit 8 7 5	2	3
♦ K Q 10 9	♦ A 5 4 3	4 ♠	9 4
♣ K 6	♣ Q 9 4	140	

A dull 16HCP 1 \clubsuit opening against an equally dull 8HCP but still 4 \spadesuit is an odds-on favourite to make.

Game contracts can be reached on smaller point counts if there are distributional features. For example,

\mathbf{West}	\mathbf{East}	West	Foot
♠ A K J 10 9 6	♠ Q 8 2		East
\heartsuit A	\heartsuit 9 6 5	1 ♣ (1)	$1\Diamond$
♦ Q J 10 9	$\diamondsuit \text{ K 7 4 3}$	1♠ 4♠	$3\spadesuit(2)$
♣ 6 5	♣ 7 4 3	4	

- (1) A strong 15HCP with a good suit should be opened with 1.
- (2) As he has already limited his hand, East is not shy in raising partner's suit with 5HCP and inviting game.

As compared to the previous deal, this is a 15HCP vs 5HCP hand that may be passed out after $1 \spadesuit$ in standard systems. However, the game contract is virtually lay-down.

With a balanced hand, opener will rebid NT over a positive suit response. Even with 3-card support for partner's suit, it is sometimes correct to first bid NT and only later raise partner's suit. For example, with \spadesuit A J 10 \heartsuit K Q 10 9 \diamondsuit Q J 4 \clubsuit K J 7, if responder bids 1 \spadesuit , it is correct to rebid 1NT showing a balanced minimum before raising spades. However, with a slightly different hand such as \spadesuit A J 10 7 \heartsuit K Q 10 \diamondsuit Q J 4 \clubsuit K J 7, the rebid could be 3 \spadesuit or 4 \spadesuit showing a minimum hand, probably balanced, with 4-card support.

Alternative sequences showing support have slightly different meanings. For example, whereas the sequence 1 - 1 - 4 would show a minimum hand with poor controls, the sequence 1 - 1 - 1 would show a balanced minimum with good controls.

The intermediate 1NT rebid can also be made when you want to find out if responder has a distributional hand. For example, when holding \spadesuit A K 8 7 \heartsuit A 7 5 3 \diamondsuit K Q 4 \clubsuit A 6, after partner's positive response of 1 \spadesuit , rebid 1NT and if partner rebids 2 \clubsuit (four-card suit), you may have very good play for 7 \spadesuit if partner is holding something like \spadesuit Q J 5 4 3 \heartsuit 8 2 \diamondsuit A 8 \clubsuit K 9 5 4. However, you need to know about the four clubs first.

With a distributional hand where you have strong support for partner's suit and the only question for slam is whether his suit has good quality, asking bids (γ and ϵ) can be used to good effect. For example,

West	East	West 1♣	East 1♠
♠ Q J 6 3 2 ♡ 5	♠ A K 10 5 4 ♥ 9 8 7	$2\spadesuit(1)$	$3\heartsuit(2)$
♦ A K Q 8♣ K J 9	♦ 10 4 ♣ A 5 3	$4\$(*) \\ 5\%(*)$	$4NT(3)$ $5\spadesuit(4)$
40 11 0 0	4 11 0 0	6♠	

- (1) γ trump-asking bid (possible slam if trumps are strong).
- (2) 2 honours, 5-card suit.
- (*) ϵ control-asking bid in clubs and hearts.
- (3) Ace or void.
- (4) No control.

With a sure loser in hearts, opener stops in the small slam.

16.3 Positive no-trump response to 1♣

With both majors, it is sometimes correct to use Stayman even when holding a 5-card suit. For example, holding \spadesuit A K Q 6 4 \heartsuit K Q 8 7 \diamondsuit A 5 \clubsuit 9 5, it

is better to bid $2\clubsuit$ over a 1NT response rather than bidding $2\spadesuit$. If responder holds something like \spadesuit J 10 2 \heartsuit A J 9 4 \diamondsuit 5 4 3 \clubsuit Q 4 3, he will certainly raise spades after $2\spadesuit$ and the 4-4 heart fit will not be discovered. In this case although there are 10 tricks in spades and 11 in hearts (given normal breaks), sometimes the difference may be 10 tricks in the 4-4 fit versus 9 in the 5-3 fit.

Similarly, with \spadesuit 3 \heartsuit A K Q 7 \diamondsuit A Q \clubsuit K Q J 10 9 8, bid *Stayman*. If partner bids 2 \diamondsuit (four hearts), you will bid 2 \heartsuit and later ask for aces. If partner has two aces, you can confidently bid the grand slam or the small slam if he shows only one ace. If partner holds something like \spadesuit A Q 6 \heartsuit J 10 8 6 \diamondsuit J 7 6 \clubsuit 5 4 3, 6 \heartsuit from the strong side is best, while 6 \clubsuit will depend on the diamond finesse.

16.4 $3 \spadesuit$ response to $1 \clubsuit$

Opener can place the contract fairly easily given responder's solid suit and use asking bids to decide if a slam is on. For example,

\mathbf{West}	\mathbf{East}	Most	Foot
• 4	♠ A K Q J 9 8 7	West 1♣	East
\heartsuit A 10 9 8 7	\heartsuit 3		$3 \spadesuit (1)$ $4 \heartsuit (3)$
♦ A 4	♦ K 7	$4\clubsuit(2)$ $7\spadesuit(4)$	$4\lor(5)$
▲ A K O 8 7	4 10 9 6	$(\mathbf{\Phi}(4)$	

- (1) Solid suit. Opener can tell that it is spades by looking at his own hand.
- (2) β -ask for outside controls.
- (3) One outside control (\diamondsuit or \heartsuit king).
- (4) 13 tricks are on top.

16.5 Unusual positive response to 1♣

If responder bids an *unusual positive*, slam is most likely on the cards and with the right cards, grand slams can be reached on very low point counts.

\mathbf{West}	\mathbf{East}	West	Foot
♠ A K Q 8 7 6	♠ J 5 4 3		East $4 \wedge (1)$
\heartsuit 9 7 6	\heartsuit A	1♣ 4™(0)	$4\diamondsuit(1)$
♦ A K 4 3	\Diamond 10 9 8 7	$4\heartsuit(2)$	4NT(3)
. —	♣ A K 4 3	$7\spadesuit(4)$	

- (1) 4-1-4-4, 4⁺-controls, 12⁺HCP
- (2) β asking for controls
- (3) 5 controls (2 steps)
- (4) Partner must have two aces and $\clubsuit K$, 13 tricks are visible.

Barring horrendous breaks and a ruff on the opening lead, this 27-point grand slam is lay-down.

16.6 Intervention after a 1♣ opening

Some examples of bidding after opponents double or overcall after a 14 opening.

After a takeout / unusual double:
$$1 \clubsuit - (Double)$$

1 \spadesuit J 8 4 \heartsuit A J 8 2 \diamondsuit 10 5 \clubsuit K 10 4 2

If the double is an ordinary takeout double either *Redouble* or bid 1NT showing a balanced 8-13HCP if vulnerable.

If the double shows majors, Redouble. If partner doubles $1\spadesuit$, you will be delighted to defend.

- 2 \spadesuit A 8 7 \heartsuit 8 \diamondsuit K J 8 6 5 4 \clubsuit Q 6 3 Bid 2 \diamondsuit . Slam is a real possibility despite the double.
- 3 \spadesuit Q 10 3 \heartsuit \diamondsuit J 10 9 7 5 3 \clubsuit Q 10 9 3 Bid 1 \diamondsuit (5-8HCP). If partner bids 1 \heartsuit , you will bid 2 \diamondsuit showing the long suit
- 4 ♠ A Q ♡ A 8 6 3 ♦ Q J 10 ♣ J 10 8 5

 Bid 2NT showing a balanced 14⁺HCP hand and good stoppers in the majors. If the double is real (not a mistake showing clubs), the information of length in majors on the right is likely to be useful in the play.
- 5 \spadesuit 6 \heartsuit K J 10 5 \diamondsuit A 7 3 2 \clubsuit J 10 8 7 Bid 3 \clubsuit showing the 4-4-4-1 hand with a black singleton.

After a direct 1-level overcall: 1 - (1 - 1)

- 6 ♠ Q ♡ A Q J 3 2 ♦ K J 6 3 ♣ J 9 7 Bid 2♡ which is natural and game forcing.
- 7 ♠ 4 ♥ J 8 6 5 4 ♦ 10 9 7 6 ♣ K J 6
 - Double to show 5-8HCP.

 \spadesuit 10 9 5 3 \heartsuit 4 \diamondsuit A 7 6 4 \clubsuit A Q 9 2 Bid 3 \diamondsuit , unusual positive showing 4-4-4-1 with a red singleton.

- 9 ♠ J ♡ Q 6 5 2 ♦ A Q 10 9 6 4 ♣ 10 2 Bid 2♦, natural and forcing.
- 10 ♠ 9 5 3 ♥ A 10 4 3 ♦ A J 7 2 ♣ 9 5 Bid 2♠. There is enough to force game but no suit to bid and no stopper to bid NT.

After an unusual no-trump overcall showing minors: 1 - (1 NT)

11 \spadesuit 10 9 \heartsuit A Q 6 4 \diamondsuit K 8 6 2 \clubsuit A Q 5

Double for penalties. If partner bids hearts, explore for slam. If not, you can also bid no-trump since the combined hands are in the slam zone.

- 12 \spadesuit A 10 9 4 2 \heartsuit Q 4 \diamondsuit 7 4 3 \clubsuit 10 9 8 Bid 2 \spadesuit (non-forcing).
- 13 \spadesuit K 9 7 4 3 \heartsuit A Q 9 8 \diamondsuit 9 2 \clubsuit 8 7 Bid 2 \diamondsuit showing spades and forcing to game.
- 14 \spadesuit A Q 2 \heartsuit A 10 8 2 \diamondsuit K J 3 \clubsuit 8 7 4 Double showing values with a balanced hand. If partner bids 2NT, you can show the 4-card hearts on the way to 3NT.
- 15 ♠ A 4 ♡ J 9 8 ♦ K 10 6 4 ♣ K 10 8 7 Double (penalty oriented) showing values with a balanced hand. There will be a massacre if the final contract is in either minor.

After a 2-level overcall: 1 - (2)

16 ♠ A Q 10 ♥ 8 5 ♦ K 7 4 ♣ K Q 10 9 6

Bid $3\clubsuit$ which is natural and forcing. The main reason for not cue-bidding is that this hand will make an excellent dummy should partner bid $3\diamondsuit$ or $3\spadesuit$ which you will happily raise showing slam interest by bypassing 3NT.

- 17 ♠ 9 8 7 2 ♡ 5 2 ♦ A K J 4 ♣ 10 6 4

 Double. This is more flexible than cue-bidding 3♡. Partner can bid 2NT with a stopper and then you could bid 3♣ (Stayman).
- 18 ♠ Q J 4 3 2 ♡ A 6 ♦ J 10 6 3 ♣ K 4 Bid 2♠.
- 19 ♠ 4 ♡ K J 10 9 4 ♦ Q J 7 ♣ A 7 3 2
 Pass. You are certain partner will bid again and you hope it is a double.
 The penalty will be a rich one if so.
- 20 ♠ A K 6 4 ♥ 8 7 6 5 ♦ A K Q 7 ♣ 7
 Bid 3♥—game-forcing with no heart stopper and no long suit. You can explore slam after getting more information from partner.

16.7 The $1\Diamond$ opening

Some examples of bidding after a $1\diamondsuit$ opening.

Opening bid

- 1 ♠ 6 3 ♡ K 4 ♦ A K J 9 ♣ K 10 9 8 4 Open 1♦ and if partner bids 1♡, rebid 2♣. Alternatively, open 1NT.
- 2 \spadesuit A J 7 6 \heartsuit 2 \diamondsuit A Q J 6 2 \clubsuit 10 7 2 Open 1 \diamondsuit rebid 1 \spadesuit if partner bids 1 \heartsuit .
- 3 \spadesuit Q 7 6 \heartsuit J 3 \diamondsuit A Q 9 \clubsuit A 10 9 8 2 Open 1 \diamondsuit and rebid 1NT over 1 \heartsuit /1 \spadesuit . You cannot bid 2 \clubsuit which would show an unbalanced hand.
- 4 \spadesuit Q 10 9 \heartsuit Q 9 7 \diamondsuit Q 4 \clubsuit A J 9 6 2 Pass with this weak 11-point hand.
- 5 \spadesuit 6 5 \heartsuit 10 \diamondsuit A K Q 10 8 \clubsuit K Q 10 9 7 Open 1 \diamondsuit and rebid 3 \clubsuit over 1 \heartsuit /1 \spadesuit showing 5-5 in the minors.

Responses to a $1 \diamondsuit$ opening

 $6 \quad \spadesuit 97 \heartsuit \land K5 \diamondsuit Q J 873 \clubsuit KQ5$

Bid $2\Diamond$ showing at least a limit raise. Raise to game over 2NT or find a forcing bid if opener rebids a minimum. You want partner to be declarer in NT with the weak doubleton spade.

- 7 \spadesuit Q 9 5 \heartsuit 5 \diamondsuit A K Q 5 3 2 \clubsuit K 6 4 Bid 3 \heartsuit —a splinter showing the singleton heart and fine diamond support.
- 8 ♠ 7 ♡ A K 9 4 2 ♦ K Q J 5 4 ♣ A 8 Bid 1♡ and use *RKCB* if opener supports hearts. Otherwise, jump to 3♦ if opener responds with 1NT showing the two-suiter and indicating slam interest.
- 9 ♠ 6 ♡ A K 7 4 ♦ 4 2 ♣ A K 10 9 4 3 Bid 2♣ and hearts next in the search for the best game contract (or slam if opener raises clubs).
- 10 \spadesuit 7 6 \heartsuit 9 \diamondsuit A J 10 6 4 2 \clubsuit 8 5 3 2 Bid 3 \diamondsuit (or 4 \diamondsuit if non-vulnerable) interfering with opponent's possible game.

Rebids after partner's one-over-one response: $1 \diamondsuit -1 \spadesuit -????$

- 11 \spadesuit 8 2 \heartsuit 7 5 \diamondsuit A Q 5 2 \clubsuit A K 10 6 5 Rebid 2 \clubsuit .
- 12 \spadesuit 6 \heartsuit K 10 \diamondsuit A J 10 8 7 \clubsuit K Q J 9 2 Rebid 3 \clubsuit showing 5-5 in the minors.
- 13 \spadesuit K 10 9 2 \heartsuit 9 \diamondsuit A K 10 6 4 \clubsuit K 6 5 Rebid 3 \spadesuit showing strong support and a singleton / void.
- 14 ♠ A 10 4 ♥ Q 7 6 ♦ J 9 6 4 ♣ A K 8 Rebid 1NT. Raising spades is inadvisable with this flat hand.
- 15 ♠ K 10 4 ♥ 4 ♦ Q J 9 7 4 ♣ A K Q 4 Rebid 2♣ as the least worst evil—if partner bids again, you can show the spade support.

16.8 Major suit openings

Some examples of bidding after a $1\heartsuit$ or $1\spadesuit$ opening.

Opening bid

- 1 \spadesuit A 10 9 7 6 5 \heartsuit Q 8 \diamondsuit K 6 \clubsuit K 5 2 The quintessential 1 \spadesuit bid.
- 2 ♠ K J 10 6 ♡ A K J 10 9 2 ♦ K 8 ♣ 9 Open 1♣—there are 15HCP, a very good suit and a singleton. With unfavourable vulnerability, it may be better to bid 1♡ since opponents may intervene at a high level after 1♣.
- 3 ♠ Q J 9 6 5 4 ♥ K 10 5 ♦ K 8 ♣ Q 7 Open 1♠—this is not a great hand and many may choose to pass it or open 2♠.
- 4 ♠ Q 10 7 5 2 ♡ A 7 4 ♦ A J 7 ♣ A 6
 Open 1♠. A case can be made for opening this hand with 1NT and with ♡KJ4 and ♣KJ (same HCP), it would be preferable to open 1NT.
- 5 ♠ 3 2 ♡ K Q 8 7 4 3 ♦ Q J 6 ♣ A K Open 1♡. Although there are 15 HCP, the suit is not good enough to play against a singleton and the hand has no singletons of its own.

Responses to a 1 opening

- 6 ♠ A J 10 9 ♡ K J 8 ♦ 10 9 7 ♣ K J 6
 - Bid 4 —it would be a very unusual hand with partner for there to be a slam. Opponents do not know if your hand type is a weak distributional hand or this one.
- 7 \spadesuit A Q 9 8 2 \heartsuit A 10 8 \diamondsuit 4 \clubsuit K 10 7 6 Bid 4 \diamondsuit (splinter) with real slam potential.
- 8 \spadesuit 9 8 7 3 2 \heartsuit A 5 \diamondsuit Q \clubsuit 10 9 7 4 3 Bid 4 \spadesuit —the textbook example of a game raise. Contrast to hand #6.
- 9 ♠ K 8 3 2 ♡ A 6 5 ♦ A K J 9 ♣ 7 4 Bid 2NT—game-forcing raise showing at least 4-card support. If partner shows shortness in clubs or hearts, slam is a distinct possibility.
- 10 ♠ A J 8 7 4 ♥ 4 ♦ Q 5 3 ♣ A 10 9 5 Bid 4♥ (splinter). Another hand with good slam potential if partner's hand matches.

Responses to a $1\heartsuit$ opening

- $\overline{11}$ \spadesuit Q 10 6 3 2 \heartsuit K 7 2 \diamondsuit A 5 3 2 \clubsuit 10
 - Bid 1 \spadesuit . If partner raises, you can bid game. If partner bids 1NT, 2 \clubsuit or 2 \diamondsuit , you will show limit raise values with 3 \heartsuit . Partner will know you have only 3 hearts since ther was no direct raise.
- 12 ♠ A J 7 6 3 ♡ 9 7 2 ♦ A K 7 5 3 ♣ —

Bid 1 \spadesuit and if partner raises, you will explore slam. If partner bids 2 \clubsuit (likely), you will bid 2 \diamondsuit (fourth-suit forcing). If partner rebids 2 \heartsuit , you could bid 5 \heartsuit (asking about trump quality) or 4 \clubsuit (splinter). This is a difficult hand to assess since opposite the first opening hand below, a grand slam is on but opposite the second, no game is possible.

Opener 1	Opener 2
♠ 8	♠ 8 6
♡ A K Q 8 6 3	\heartsuit Q 8 5 4 3
\Diamond Q J 7	♦ J 6
♣ 10 7 6	♣ A K Q 6

13 \spadesuit Q 10 \heartsuit A 10 9 8 \diamondsuit 4 3 2 \clubsuit Q 9 6 5

Bid 3♣—a constructive Bergen raise.

14 ♠ Q 7 6 ♥ J 8 7 6 ♦ — ♣ A J 9 8 5 3

Bid $4\heartsuit$. It is certain that the opponents have some high card points so this makes them start at a high-level if they are going to bid.

15 \spadesuit A 9 4 \heartsuit Q 6 4 3 \diamondsuit J 10 3 \clubsuit A 6 2 Bid 3 \diamondsuit —a Bergen limit raise.

16.9 The 2♣ opening

Some examples of bidding after a $2\clubsuit$ opening.

Opening bid

- 1 ♠ K J 6 2 ♥ 3 ♦ 9 2 ♣ A Q J 9 8 2
 - A good example of a hand that should be opened with a bid of $2\clubsuit$.
- 2 \spadesuit Q 10 6 \heartsuit K Q 6 \diamondsuit 6 3 \clubsuit A Q 8 4 3 Bid 1 \diamondsuit not 2 \clubsuit .
- 3 ♠ K 3 ♡ ♦ A J 8 2 ♣ A Q J 10 9 7 4 Bid 1♣. This hand is too good for a 2♣ opening.
- 4 \spadesuit Q 8 6 \heartsuit A 6 \diamondsuit 10 8 \clubsuit A K Q 8 7 4

Bid $1\clubsuit$ and rebid $2\clubsuit$. Let partner be declarer in NT if that is the right spot.

5 \spadesuit 6 2 \heartsuit 8 7 \diamondsuit Q 10 \clubsuit A K Q J 9 8 2 Bid 3NT—"Gambling", showing a solid suit with no ace or king outside.

Responses to a 24 opening

- 6 ♠ A K 10 6 ♥ J 8 6 5 ♦ 10 9 ♣ 9 7 6
 - Bid $2\diamondsuit$. This is a perfect hand to enquire about majors. If partner bids a major or $3\clubsuit$, pass (you need at least another queen to raise partner's major). If partner bids 2NT, correct to $3\clubsuit$.
- 7 ♠ K 10 9 8 3 2 ♡ 5 ♦ 9 7 5 ♣ K J 7 Bid 2♠. If partner raises spades, raise to game. Pass if he denies spades by rebidding 3♣ or bid 3♣ if he rebids 2NT.

- 8 ♠ K 8 5 ♡ K J 9 5 ♦ A 10 6 3 ♣ 9 3 Bid 2NT (invitational). If partner accepts game by bidding 3♡, bid 4♡. If partner accepts with 3♠, raise to 3NT.
- 9 ♠ A J 10 7 6 3 ♡ K Q 9 ♦ 10 7 ♣ Q 2 Bid 3♠. This is forcing to game and shows at least 6 spades. Pass if partner signs-off in 3NT.
- 10 ♠ K 7 3 ♥ 9 4 2 ♦ A 9 3 2 ♣ 9 7 3 Bid 3♣ forcing *LHO* to come in at the three-level. The Law of Total Tricks will protect you . . .

Rebids after partner's invitational response in a suit: $2\$-2\heartsuit-???$

- 11 K Q J 5 ♡ 5 3 ♦ 4 ♣ A Q 10 9 6 5
 - Bid $2\spadesuit$. This hand will play better in one of your suits so let partner know you have four spades.
- 12 \spadesuit 4 3 2 \heartsuit A Q \diamondsuit K 7 \clubsuit A 10 7 6 4 3 Pass. There is no reason to think there is a better spot.
- 13 \spadesuit 3 \heartsuit A Q 10 8 \diamondsuit 10 8 \clubsuit A K J 10 8 4 Bid 3 \spadesuit (splinter) or 4 \heartsuit . Ten tricks should be on with this dummy.
- 14 ♠ 9 6 ♥ K J 6 3 ♦ J 10 ♣ A K Q 7 4 Bid 3♥. Although the hand is a maximum, the shape is not inspiring. It may have been preferable to open 1♦ with this hand.
- A K J 2 ♥ 5 2 ♦ 3 ♣ A K J 10 9 6 2
 Bid 3♣. Although you have a doubleton heart, the clubs are good enough to play opposite a void. It must be better to have it as trumps.

16.10 The $2\Diamond$ opening

Some examples of bidding after a $2\Diamond$ opening.

Responses to 2\$

- 1 ♠ Q J 5 4 3 ♡ A 10 5 ♦ K 10 5 ♣ A 10 Bid 4♠. Why mess about?
- 2 ♠ 5 4 ♡ A 9 ♦ A 10 8 7 6 4 3 ♣ 6 3

 Pass. You would also pass if one of the low diamonds was a low heart since bidding 2♡ may land you in a 3-3 fit.
- 3 ♠ 2 ♡ J 10 7 3 ♦ K Q 6 4 ♣ K 8 5 2 Bid 2♡. If partner is 4-3-1-5, he will bid 2♠ which can be corrected to 3♣. Do not ask for shape since that may push bidding to the 4-level.
- 4 ♠ A J ♡ A 9 3 ♦ A J 10 9 7 ♣ 10 8 7 Bid 3NT. Diamonds are well under control and there are no better prospects for game.
- 5 ♠ A Q 10 6 5 ♥ K J ♦ 9 8 7 ♣ A Q 5 Bid 2NT—there is a grand slam possible here. Whatever partner bids, you will bid diamonds next to ask about controls.

Responding over RHO's 2-level suit overcall: $2\lozenge - (2\heartsuit) - ????$

6 ♠ Q 10 6 ♡ J 10 9 ♦ K Q J 4 ♣ A 6 4

Double. This can get ugly since opponent is bidding at the 2-level with at most seven trumps and without the balance of HCP.

7 \spadesuit 9 \heartsuit 10 6 4 \diamondsuit A Q 8 6 5 4 3 \clubsuit K 8

Pass. You could double but that would probably drive the opponents to spades which is a better spot.

8 \spadesuit 8 4 \heartsuit 3 \diamondsuit A K 10 5 \clubsuit 9 8 7 6 5 3 Bid 4 \clubsuit . This is a preemptive bid to make *LHO* decide whether to support at the 4-level.

Responding over RHO's 3-level suit overcall / cue-bid: $2\lozenge - (3\lozenge) - ????$

- 9 ♠ 9 5 2 ♡ A 9 5 ♦ A J 7 3 ♣ 7 4 3 Double.
- 10 ♠ K 9 3 ♡ A Q 10 ♦ A 10 2 ♣ J 10 9 4

A *Double* is probably best with favourable vulnerability.

However, with unfavourable vulnerability, it is a choice between 3NT (if you feel lucky) and 5**4** (more realistic).

11 \spadesuit A 10 9 8 4 2 \heartsuit 8 4 3 \diamondsuit 10 5 \clubsuit 7 4 Bid 3 \spadesuit (non-forcing).

Responding after RHO's double: $2\lozenge -(Double) - ???$

12 **A** K 9 6 2 \heartsuit K 4 \diamondsuit A Q J 6 **A** 8 6 2

Redouble. There could be overtricks here even if partner plays in a 4-1 diamond fit.

13 \spadesuit K J 9 6 5 \heartsuit J 8 6 4 \diamondsuit J 4 \clubsuit Q 7

Bid 2 — if opponents compete, you can try hearts next.

14 \spadesuit 10 6 4 2 \heartsuit Q 10 6 3 \diamondsuit J 10 \clubsuit K 7 5

Pass. Let partner describe his shape with a redouble or bid.

15 \spadesuit A 5 \heartsuit K Q 10 \diamondsuit K 10 9 8 6 3 \clubsuit Q 2

Redouble. You have a lot of diamonds and good spot cards. Even if opponent's have a 4-4 spade fit, they may not find it and even if they do it is likely you have a penalty double against them in spades.

16.11 "Gambling" and "Namyats" openings

Responses to a "Gambling" 3NT

 $1 \quad \blacktriangle 32 \heartsuit A K 85 \diamondsuit A K J 4 3 \clubsuit J 10$

Bid $4\Diamond$ asking partner to show singletons or voids. If he is short in spades, you can commit to a club slam.

2 ♠ A Q J ♥ 9 7 4 3 ♦ 10 6 ♣ A J 8 6

Pass. Opponents may be able to run some hearts but the odds are in your favour. Even if someone has five hearts, he may not be on lead or the suit may be blocked.

 $3 \quad \spadesuit \land 9 ? ? \land A \land 9 \land 5 ? \land 6 \land 5 ? \land 6 \land 6 \land 8 \land 5$

Bid 5NT. This asks partner to bid $7 \diamondsuit$ with AKQJ. You certainly want to be in $6 \diamondsuit$ although there are no guarantees.

4 \spadesuit A \heartsuit A K Q 10 8 4 \diamondsuit K Q J 9 \clubsuit 5 4 Bid 6 \clubsuit which should be cold.

5 \triangle Q J 8 4 \heartsuit 6 5 \diamondsuit 10 8 7 \triangle J 10 9 7

Bid 5. You don't care what partner's suit is (although it looks to be diamonds). What you do know is that opponents can make a lot of tricks in hearts (or even spades) and this robs them of room to find their best spot.

Responses to a "Namyats" $4 \diamondsuit$ opening

- 6 \spadesuit 10 \heartsuit A 7 6 5 \diamondsuit K Q 9 5 \clubsuit A K 3 2 Bid 4NT (*RKCB*).
- 7 ♠ 8 7 4 ♡ K J 10 9 ♦ K Q 6 5 ♣ K J Bid 4♠. Partner cannot have many aces in addition to a solid suit (he probably would have opened 1♣ if so) so slam is out of question.
- 8 ♠ 9 7 2 ♥ Q J ♦ A K 6 5 2 ♣ A J 10 Bid 4♥, a relay to partner's suit. You plan to cue-bid 5♣ inviting slam and if partner has a cue-bid in hearts, you can bid 6♠.
- 9 \spadesuit J 7 5 2 \heartsuit A 9 2 \diamondsuit A K Q 5 3 \clubsuit 4 Bid 4NT (*RKCB*). If partner shows 3 key cards, you will bid 7 \spadesuit . This is likely to be lay-down after the opening lead.
- 10 ♠ 8 7 2 ♡ A Q J 7 3 ♦ ♣ A 10 7 4 2
 With a solid suit and the heart king, 7♠ is odds-on. Since there is no way to confirm both of these (an asking bid will only find the heart king), it is probably best to simply bid 6♠. The success of the slam may depend on the heart finesse, finally.
